

Final Project Completion Report

Project Name and Number: Office and Critical Parts Space Expansion Study, #4337

Description: The District is conducted a study of future building needs for District staff and critical parts storage. Many of the current staff workspaces are at capacity and new workspace solutions are needed. Additional building space is also needed to store critical parts and equipment to effectively respond to emergencies and natural disasters. The objective of this project was to produce a 10-year building plan which will allow the District to budget for projects to satisfy the need for office and equipment space. The scope will included the evaluation and a summary of the current and future workspace needs, equipment and vehicle storage needs, potential workspace and storage solutions, cost estimates, drawings, implementation plan, and a final report outlining the findings and recommendations.

District Project Manager: Travis Christensen

Engineer: Place Collaborative

Design Status: 100%

Original Engineering Contract Amount: \$280,102

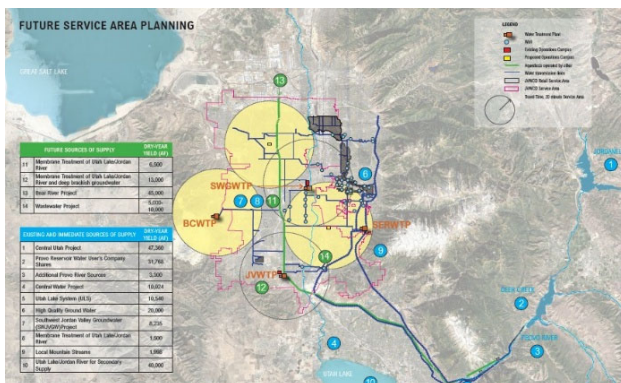

Final Engineering Contract Amount: \$280,102
