NOTICE OF A REGULAR MEETING OF THE BOARD OF TRUSTEES
OF JORDAN VALLEY WATER CONSERVANCY DISTRICT

PUBLIC NOTICE is hereby given that the Board of Trustees of the Jordan Valley Water Conservancy District will hold a regular Board meeting at 3:00 p.m. on Wednesday, August 12, 2026, at the District Administration Building located at 8215 South 1300 West, West Jordan, Utah. Trustees and members of the public may attend this meeting electronically or in person. For information on how to join the meeting electronically, visit Jordan Valley Water Conservancy District's website at (<https://jvwcd.org/calendar/1962/jvwcd-board-meeting>)

Agenda

1. Call to order and introduction of visitors
2. Approval of common consent items:
 - a. Minutes of the Work Session held July 6, 2026; and the regular Board meeting held July 8, 2026
 - b. Trustees' expenses report for July 2026
3. Public comments
4. 2025 Wattsmart Business Demand Response Participation
5. Member Agency feature – City of West Jordan
6. Core Mission Reports
 - a. Water supply update
 - b. Water quality update
7. Standing Committee Reports
 - a. Finance update
 - b. Conservation update
8. Community Engagement activities
 - a. Consider approval of a water conservation funding agreement with Granger-Hunter Improvement District
 - b. Consider approval of a water conservation funding agreement with the City of South Jordan
 - c. Consider approval of a water efficiency standards agreement with the City of South Jordan
9. Engineering & Water Development activities
 - a. Consider approval of grant of easement to SummitIG, LLC at 3582 West 10200 South, South Jordan, Utah
10. Water Quality & Operations activities
 - a. Consider expenditure approval for outsourced laboratory services for fiscal year 2026/2027

JORDAN VALLEY WATER CONSERVANCY DISTRICT

NOTICE OF A REGULAR BOARD MEETING
OF THE BOARD OF TRUSTEES

August 2026

PAGE 2

11. Reporting items:
 - a. Capital projects report for July 2026
 - b. Report on performance scorecard for July 2026
 - c. Report on Utah's Statewide Water Assessment
 - d. Report on final EIS for Colorado River Operations
 - e. Report on facilities rental agreements signed by the General Manager
 - f. Report on Media Coverage
12. Upcoming meetings:
 - a. Work Session, Tuesday, September 8 (virtual), at 3:00 p.m.
 - b. Regular Board meeting, Wednesday, September 9 (in-person), at 3:00 p.m.
13. Potential closed meetings to be held electronically and in person with Trustees
 - a. Discussion of sale or purchase of real property and/or water rights or water shares
 - b. Discussion of confidential information provided during procurement process
 - c. Discussion of character and professional competency of an individual
 - d. Discussion of pending or reasonably imminent litigation
14. Open meeting
15. Adjourn

Date: August 8, 2026

By: _____
Jacob C. Young, District Clerk

If you would like to participate in an electronic meeting where public comment is allowed, you must use a computer, tablet or phone that is capable of connecting with the WebEx meeting software, app, or web browser. A person who desires to speak must submit a message in the chat box at the beginning of the meeting indicating the person's name, address and whom the person represents. Once recognized by the chair, the person should turn on their video and unmute their microphone to speak.

Participants who dial in to the meeting by phone will be able to listen to the meeting but will not be able to speak.

Reasonable accommodation will be made for disabled persons needing assistance to attend or participate in this meeting. Please contact Mindy Keeling at 801-565-4300.

COMMON CONSENT ITEMS

**MINUTES OF THE WORK SESSION OF THE BOARD OF TRUSTEES
OF JORDAN VALLEY WATER CONSERVANCY DISTRICT**
(Unapproved and subject to change)

July 6, 2026

The Jordan Valley Water Conservancy District Board of Trustees Work Session was primarily held electronically, with an option for in-person attendance as needed, on Monday, June 10, 2026, at 3:08 p.m. at the District Administration Building located at 8215 South 1300 West, West Jordan, Utah.

This meeting was conducted electronically in accordance with the Utah Open and Public Meetings Act (Utah Code §§ 52-4-101 et seq.) and Chapter 7.12 of the Administrative Policy and Procedures Manual ("Electronic Meetings"). All attendees participated electronically unless otherwise noted.

Trustees:

Corey L. Rushton, Board Chair
John Taylor, Vice Chair
Andy Pierucci
Barbara L. Townsend
Cindy Wood
Dawn R. Ramsey
Mick M. Sudbury
Zach Jacob

Trustees Not Present:

John Richardson

Staff Present:

Jacob Young, General Manager/Chief Executive Officer
David Martin, Chief Financial Officer
Shazelle Terry, Chief Operating Officer
Benjamin Stanley, General Counsel
Brian Callister, Director of Asset Management
Carl Wilkins, Director of Digital Services
Clifton Smith, Digital Solutions Group Leader
Courtney Brown, Conservation Division Manager
Eric Stone, Controller
Gordon Batt, Director of Water Quality & Operations
Kelly Good, Director of Community Engagement
Kurt Ashworth, Human Resources Manager
Lisa Wright, Administrative Assistant III (in person)
Martin Feil, Database Administrator
Mindy Keeling, Executive Assistant (in person)
Shane Swensen, Director of Engineering & Water Development
Teresa Atkinson, Administrative Assistant III
Travis Christensen, Engineering Group Leader
Wade Tuft, Water Supply Manager

Welcome	Mr. Corey Rushton, Chair, called the meeting to order at 3:08 p.m. He reviewed guidelines for the virtual meeting, requesting that Trustees keep their video on and remain muted when not speaking to ensure professional focus. Mr. Rushton noted that while the chat feature is available for clarifying questions, any substantial discussions must be conducted verbally for the official record.
Review agenda for July 8, 2026, Board meeting	Mr. Jacob Young, General Manager, reviewed the upcoming Board meeting agenda, noting that the "Member Agency Feature" would highlight WaterPro this month. He explained that JVVCD has prioritized agencies that have recently requested contract increases, such as WaterPro, West Jordan, Riverton, and potentially South Jordan, so that the Board can hear from them directly over the next few months. Mr. Young noted other key items for the Wednesday meeting included approval of modified funding letters for BRIC grants following a state review, the award of professional services for bond underwriters, and a report on the recent ACE conference. He also indicated there may be a need for a closed session to discuss a procurement investigation regarding the 2026 distribution pipeline replacement project in Mill Creek.
COMMITTEE REPORTS	
Conservation Committee	Mr. Young presented on integrating smart irrigation controllers at JVVCD sites, emphasizing JVVCD's commitment to "leading by example" within the community. Mr. Carl Wilkins, Director of Digital Services, and Ms. Kelly Good, Director of Community Engagement, detailed the rollout of WeatherTRAK controllers, which have already been installed on 50% of JVVCD's irrigated landscape. It was highlighted that the technology allows for centralized management via a mobile app, automatic leak detection, and weather-based adjustments that have shown water savings of up to 70% in past case studies. Chair Rushton asked how the technology determines watering needs. Ms. Good clarified that while the system monitors local evapotranspiration data automatically, staff still perform manual calibrations to ensure efficiency rather than just keeping the grass green. Mr. Young added that JVVCD is prepared to offer its experience with these digital solutions as best practice for member agencies to implement in their own parks and facilities.
Integrating Smart Irrigation Controllers at District Sites	
Audit Committee	Mr. David Martin, Chief Financial Officer, reported on the recent Audit Committee meeting, introducing Richey May & Co. as the new internal auditor firm. He outlined their immediate scope of work, which includes an examination of a recent external fraud incident to evaluate and strengthen internal controls, as well as comprehensive testing of various payment methods like wire transfers and ACH payments. Mr. Martin noted that the independent auditors, Gilbert and Stewart, are scheduled to perform the annual financial statement audit in September, with a final report expected in November. Chair Rushton and the Board reviewed the scope of the internal audit, concluding that it was thorough and ready to proceed.
Auditors' scopes	

**DISCUSSION
ITEMS**

Legal/Policy

**Development
baseline request**

Mr. Young and Mr. Clifton Smith, Digital Solutions Group Leader, provided an update on the Water Budget Policy implementation, specifically the development of a monitoring tool to track water allocations. Mr. Smith explained that JWWCD is requesting baseline data from member agencies using GIS shapefiles to identify developed versus undeveloped lands and quantify existing and future residential connections. He indicated that Riverton City and WaterPro are serving as the pilot group for this data collection process before sending the request to all member agencies later in the year. Trustee Ramsey and Trustee Pierucci expressed appreciation for the collaborative approach, noting that it builds on existing city planning efforts. Chair Rushton inquired how the policy would account for "under-developed" land, such as a retail building being converted to high-density housing; Mr. Young responded that the tool specifically captures "future ERC's" and "entitled ERC's" to ensure such density changes are factored into the long-term water budget.

**Digital
Services**

**Proposed
artificial
intelligence
usage
procedures**

Mr. Young introduced the proposed Artificial Intelligence (AI) Standard as management guidance for implementing board policy. Mr. Wilkins explained that AI was already being used throughout JWWCD, but establishing clear guardrails for responsible, secure, and ethical use is necessary. He noted the draft evolved through multiple revisions as new AI use cases emerged. Mr. Wilkins noted that the standard provides a flexible framework covering technologies such as large language models, image generators, and automation tools, and applies to all employees, volunteers, and interns. The standard will distinguish between incidental uses, such as asking Siri for directions for a nearby restaurant vs. intentional uses such as using AI to create reports or process JWWCD data. Mr. Wilkins noted that the intentional use requires JWWCD-issued accounts, opting out of data sharing whenever possible, and prohibits entering personally identifiable or GRAMA-protected information unless specifically authorized. He stated that the standard also requires human review of AI-generated content before it is used in JWWCD decisions or publications to ensure accuracy, minimize bias, and comply with copyright requirements.

Trustees discussed data privacy and AI governance. Trustee Dawn Ramsey asked whether JWWCD had considered a proprietary, closed-loop AI system to keep data internal. Mr. Wilkins said the original draft was based on that approach but was deemed too costly for now, though he expects JWWCD will eventually adopt a private, cost-effective model. He also explained that the AI Committee, with representatives from all six departments, will share effective AI practices, evaluate emerging tools, and identify both valuable and high-risk applications.

Chair Corey Rushton questioned the standards for adopting new, unknown tools, asking how JWWCD would handle a request for a tool no one on the committee understood. Mr. Wilkins stated that a lack of knowledge would be a red flag for denial, and Mr. Young clarified that JWWCD's philosophy is to avoid being first adopters, but instead, JWWCD intends to position itself on the border of "early adopters" and the "early majority," only recommending tools that are proven and ready for operational use. Mr. Wilkins addressed

concerns about personally identifiable information (PII) in conservation data—such as using AI to analyze AMI meter spikes and noted that JVVCD is already using machine learning for data modeling in other areas, such as the "digital twin" at the SERWTP, and that the AI standard will remain flexible to adapt to shifting operational needs.

**Community
Engagement**

**Member Agency
grant for City of
West Jordan**

Ms. Good presented a member agency grant application from West Jordan City for \$87,000, which includes projects for leak detection sensors on fire hydrants, smart irrigation upgrades at three city parks, and community outreach materials. Chair Rushton expressed interest in the fire hydrant technology, asking if other agencies currently use it. Staff promised to provide more detail on West Jordan's cost-benefit analysis at the Wednesday meeting. Trustee Zach Jacob noted his excitement that his city is testing the new technology rather than waiting for others to go first.

**Key Results
Phase 1**

Ms. Shazelle Terry, Chief Operating Officer, marked a significant milestone for the district by presenting a completion report for "Phase I" of the strategic plan, noting that staff has successfully finished nearly all the original operational objectives established in 2024. She indicated accomplishments include a five-year staffing plan, public health stewardship training for frontline employees, a strategic asset management plan, and an electronic emergency response pocket guide for staff phones. Ms. Terry also highlighted new emergency contract language that ensures major contractors will prioritize JVVCD repairs during a crisis. Mr. Young concluded by emphasizing JVVCD's leadership in the Great Salt Lake crisis, noting that Jordan Valley provides 21,000 of the 75,000 acre-feet of water recently secured for the lake by the state's trust. Trustee Cindy Wood shared feedback regarding resident frustration with turf removal requirements, which led to a discussion on the need for better public education regarding state-mandated funding rules for living lawns.

Adjourn

Mr. Rushton called for a motion to adjourn. Ms. Dawn Ramsey moved to adjourn. Followed by a second from Mr. John Taylor. The meeting adjourned at 4:58 p.m.

Corey L. Rushton
Chair of the Board of Trustees

Jacob C. Young
District Clerk

**MINUTES OF THE REGULAR BOARD MEETING OF THE
BOARD OF TRUSTEES OF JORDAN VALLEY WATER CONSERVANCY DISTRICT**

(Unapproved and subject to change)

July 8, 2026

A Regular Board meeting of the Board of Trustees of the Jordan Valley Water Conservancy District was held both in person and electronically on Wednesday, July 8, 2026, at 3:04 p.m. at Jordan Valley Water Conservancy District's administration building located at 8215 South 1300 West, West Jordan, Utah.

The electronic aspects were conducted in accordance with the Utah Open and Public Meetings Act (Utah Code Ann. §§ 52-4-101 et seq.) and Chapter 7.12 of the Administrative Policy and Procedures Manual ("Electronic Meetings").

Trustees Present:

Corey L. Rushton, Chair
John Taylor, Vice Chair
Zach Jacob
Andy Pierucci (electronic)
Dawn R. Ramsey (electronic)
John Richardson
Mick M. Sudbury (electronic)
Barbara L. Townsend
Cindy Wood

Staff Present:

Jacob Young, General Manager
Shazelle Terry, Chief Operating Officer
Ben Stanley, General Counsel
David Martin, Chief Financial Officer
Eric Stone, Controller
Brian Callister, Director of Asset Management
Carl Wilkins, Director of Digital Services
Gordon Batt, Director of Water Quality and Operations
Kelly Good, Director of Community Engagement
Shane Swensen, Director of Engineering and Water Development
Clifton Smith, Digital Solutions Group Leader
Kurt Ashworth, Human Resources Manager
Martin Feil, Database Administrator (electronic)
Mindy Keeling, Executive Assistant
Lisa Wright, Administrative Assistant III
Teresa Atkinson, Administrative Assistant III
Alisha Kimmerle, Administrative Assistant III
Travis Christensen, Engineering Group Leader
Margaret Dea, Senior Accountant (electronic)
Sam Mingo, Business Data Analyst (electronic)

Also Present:

Steve Cunningham, Assistant General Manager, WaterPro, Inc.
Jason Helm, General Manager, Granger-Hunter Improvement District (electronic)
Mark Chalk, General Manager, Taylorsville-Bennion Improvement District (electronic)

Greg Anderson, General Manager, Kearns Improvement District
Clint Dilley, General Manager, Magna Water District (electronic)
Brien Maxfield, Senior Engineer, Draper City
David Robertson, Principal/Owner, LRB Public Finance Advisors
Matt Basham, Councilmember, Herriman City
Robert Moore, General Counsel, Central Utah Water Conservancy District
Gary Henrie, Civil Engineer, Bureau of Reclamation
Ana Paz, Associate Engineer, South Jordan City (electronic)
Brittany Sorenson, Brown & Caldwell (electronic)
Stacie Olsen, Assistant Public Works Director, Riverton City (electronic)
Stockton Denos, Consultant, AE2S
Rawlins Thacker, City of South Jordan
Shawn Robinson, Director of Operations and Maintenance, Taylorsville-Bennion Improvement District (electronic)
James Moher, Senior Associate, Hazen and Sawyer
Branden Anderson (electronic)

**Call to order and
introduction of
visitors**

Mr. Corey Rushton, Chair, convened the Board meeting of the Jordan Valley Water Conservancy District Board of Trustees at 3:04 p.m. on Wednesday, July 8, 2026. Mr. Rushton introduced the members of the Board and the public who attended the meeting both in person and electronically.

**Approval of common
consent items**

Mr. Rushton presented the minutes of the Work Session held June 8, 2026, and the regular Board meeting held June 10, 2026. He also presented the June 2026 Trustees' Expenses Report. Mr. Rushton called for a motion. Ms. Barbara Townsend moved to approve the minutes of the June 8 and 10 meetings and the Trustees' Expenses Report for June 2026. Following a second by Mr. John Richardson, the motion was unanimously approved by those present as follows:

Mr. Rushton – aye	Mr. Richardson – aye
Mr. Taylor – aye	Mr. Sudbury – aye
Mr. Jacob – aye	Ms. Wood – aye
Mr. Pierucci – aye	Ms. Townsend – aye
Ms. Ramsey – not present	

Public Comments

Mr. Matt Basham, Herriman City, provided a report regarding his recent experience with JVVCD's water-wise landscaping incentive program. Mr. Basham praised the efficiency of the application process and the assistance provided by staff members Sophie Bye and Abby Little, who helped him navigate incentive codes and plant coverage calculations.

**Member Agency
Feature – WaterPro,
Inc.**

Mr. Steve Cunningham, Assistant General Manager, WaterPro, Inc. (WaterPro), provided a presentation on the history and operations of WaterPro, which was incorporated in 1888 as Draper Irrigation Company. WaterPro Inc. was formed in the 1990's as a way to address the culinary water delivery side of the company. He detailed their service area within Draper, Bluffdale, and Sandy, and their various water sources, including mountain streams, deep wells, and JVVCD supply. Mr. Cunningham discussed the unique 40-year-old exchange

agreement between the WaterPro treatment plant and SERWTP where excess runoff water is collected by JVVCD and WaterPro purchases water back as needed. Mr. Cunningham also highlighted successful conservation efforts, such as secondary metering that has reduced consumption by 25-30%. Future focus areas include adapting to climate change, reclaimed water projects, and addressing demand from rapid regional growth.

Mr. Rushton inquired as to WaterPro's approach to shoulder season watering as it relates to conservation. Mr. Cunningham replied that the objective is to curb water use by encouraging their customers to switch from culinary to secondary water for irrigation as they bring the reclaimed water project online.

**Core Mission
Reports**

Water supply update

Ms. Shazelle Terry, Chief Operating Officer, reviewed the water deliveries report, noting that conservation efforts and messaging are continuing to make a difference with total wholesale and retail usage down 16% from the same time last year. She highlighted modifications to the Wholesale Contract Progress report that now includes a 10% reduction goal to better track conservation progress. She presented a daily System Demand Report from JVVCD's SCADA system that details current usage in comparison to the previous year and a five-year average. Ms. Terry also reviewed the Reservoir Report, and Water Sources Update indicating that JVVCD continues to pull hard on storage due to ongoing drought conditions.

Water quality update

Mr. Gordon Batt, Director of Water Quality and Operations, reported on the 2025 Consumer Confidence Report (CCR). The report includes all detected data for the calendar year and a five-year look-back for any other parameters not sampled in the reported calendar year. He noted that it was delivered to all Member Agencies by the April 1 deadline and to JVVCD retail customers by the July 1 deadline. Mr. Batt mentioned that starting in 2027, regulations will require the CCR to be issued every six months. He commended JVVCD's water quality staff for collecting 14,532 samples in 2025 to help ensure the safety and quality of JVVCD's water supply.

**Standing Committee
Reports**

Finance update

Mr. Eric Stone, Controller, reviewed the Financial Report for May 2026 stating that water sales are on track with property tax revenue and investment income exceeding the budget. Total operating expenses for the 2026 year-to-date are currently 13% less than budget amount. He estimated a total transfer of approximately \$7 million to the Revenue Stabilization Fund at the close of the fiscal year. Capital project spending for the year was noted to be 70% higher than the previous year, although still 18% lower than budget. Mr. Stone then reviewed costs for water share purchases and landscape incentive payments during the month of May.

Conservation update

Ms. Kelly Good, Director of Community Engagement, reported that JVVCD is on track to exceed its goals for the year, with approximately 4,000 class attendees and 21,000 visitors to the Conservation Garden

Park to date. Regarding landscape rebates, JVVCD has already reached its annual goal of 600 applications halfway through the season. Ms. Good added that staff efforts in field education have been instrumental in closing the gap toward the goal of 100% project success for participants.

**Community
Engagement
Activities**

**Consider approval of
a Water
Conservation
Funding Agreement
with the City of West
Jordan**

Ms. Good presented information on a Water Conservation Funding Agreement with the City of West Jordan to fund four conservation projects, including leak detection sensors in hydrants, restoring and modernizing secondary irrigation pumps at three city parks, identifying high water use city properties for on-site audits, and expanding educational community outreach to better educate residents on effective indoor and outdoor water conservation practices. Ms. Good said staff recommended awarding \$87,000 to the City of West Jordan for water conservation funding.

Mr. Rushton called for a motion on the recommendation. Mr. John Taylor moved to approve a Water Conservation Funding Agreement with the City of West Jordan in the amount of \$87,000. Following a second by Ms. Barbara Townsend, the motion was unanimously approved by those present as follows:

Mr. Rushton – aye
Mr. Taylor – aye
Mr. Jacob – aye
Mr. Pierucci – aye
Ms. Ramsey – aye

Mr. Richardson – aye
Mr. Sudbury – aye
Ms. Wood – aye
Ms. Townsend – aye

Ms. Dawn Ramsey joined the meeting electronically at 3:53 p.m.

**Engineering & Water
Development
Activities**

**Consider approval of
funding commitment
letters for the
2024/2025 BRIC
grant applications**

Mr. Shane Swensen, Director of Engineering and Water Development, presented information on funding commitment letters for two FEMA Building Resilient Infrastructure and Communities (BRIC) grants related to upgrades for the JVVTP Sedimentation Basins Project and the Jordan Aqueduct Seismic Resiliency Project. He stated the commitment letters were previously approved by the Board in the May and June 2026 Board meetings but have been revised to incorporate comments received by the State of Utah following the initial submittal. Mr. Swensen requested approval of the funding commitment letters to be signed by the General manager, authorize the Chief Operating Officer to sign the FEMA grant application, and authorize the General Manager and General Counsel to make minor revisions.

Mr. Rushton called for a motion on the recommendation. Mr. John Richardson moved to approve the funding commitment letters to be signed by the General manager, authorize the Chief Operating Officer to sign the FEMA grant application, and authorize the General Manager and General Counsel to make minor revisions. Following a second by Mr. Mick Sudbury, the motion was unanimously approved by those present as follows:

Mr. Rushton – aye
Mr. Taylor – aye
Mr. Jacob – aye
Mr. Pierucci – aye
Ms. Ramsey – aye

Mr. Richardson – aye
Mr. Sudbury – aye
Ms. Wood – aye
Ms. Townsend – aye

Financial Matters

**Consider award of
professional
services contracts
for bond underwriter
services**

Mr. David Martin, Chief Financial Officer, presented information on the selection process of professional services for bond underwriting to assist with upcoming bond issues. He mentioned that the Government Finance Officers Association best practices suggest using multiple underwriters for bond issuances using the negotiated method. He said staff used the competitive process of requesting Statements of Qualifications for selection of underwriters and five Statements of Qualifications were received. He said fees were negotiated with the highest ranked firm and are considered reasonable. Mr. Martin recommended award of five-year professional services contracts for bond underwriter services to Stifel Nicolaus & Co. as senior manager, and Morgan Stanley & Co. as co-manager, and to authorize the General Manager and General Counsel to review and agree to the contracts and services and fees negotiated.

Mr. Rushton called for a motion on the recommendation. Ms. Cindy Wood moved to approve professional services contracts for bond underwriter services to Stifel Nicolaus & Co. and Morgan Stanley & Co., and services and fees negotiated. Following a second by Mr. John Taylor, the motion was approved by those present as follows:

Mr. Rushton – aye
Mr. Taylor – aye
Mr. Jacob – aye
Mr. Pierucci – aye
Ms. Ramsey – aye

Mr. Richardson – aye
Mr. Sudbury – aye
Ms. Wood – aye
Ms. Townsend – aye

Reporting Items

Mr. Ben Stanley, General Counsel, reported on the quarterly verification of compliance, confirming that JVWCD is compliant with legal requirements and internal practices as recommended by the state auditor.

Mr. Travis Christensen, Engineering Group Leader, reported on the final completion of the Bell Canyon Flow Measurement Structure project.

Ms. Terry reported on the monthly performance scorecard noting that Customer Satisfaction and Stakeholder Support has moved to green status due to increased member agency engagement. Employee and Leadership Development has moved to yellow status due to eleven employees leaving in the last year, with six of those being retirements of long-term employees. She stated that JVWCD is continuing to work on retention programs. Ms. Terry reviewed other KPI measures pointing out Community Sustainability, which is currently in red status. She said the adjusted GPCD progress needs refinement since it is currently only

calculated once a year. She concluded with the Quarterly Key Results Status, reporting that Phase 1 is essentially complete.

Mr. Young provided an update on the Water District Water Development Council, reporting on the renewal of contracts for the Technical Director (Mike Collins), Communication Services (FCH Group), and Engineering Services (Bowen, Collins & Associates, Inc.) to continue work on generational water projects. Mr. Young reviewed other routine reporting items which included Central Utah Project/CUWCD activities report, and media coverage. He then reported on JVWCD activities at the AWWA ACE26 annual conference including presentations by JVWCD staff, award of the Water Conservation Ad Campaign to Kearns Improvement District, congressional meetings, and various tours and events involving staff and Trustees.

Mr. Young recognized Trustee Dawn Ramsey for receiving the America's 250 Public Service Champions award and commended her for meaningful impact to the JVWCD Board of Trustees, the City of South Jordan, and the many other entities she serves.

Upcoming Meetings

Mr. Rushton reviewed the upcoming meetings including the Work Session, Monday, August 10 (virtual) at 3:00 p.m.; and the regular Board meeting, Wednesday, August 12 (in-person) at 3:00 p.m.

Closed Meeting

Mr. Rushton proposed convening closed meetings at 4:29 p.m. for discussion of confidential information provided during procurement process. Ms. Barbara Townsend moved to go into closed session for the discussion. Following a second by Mr. John Taylor, the motion was unanimously approved by those present as follows:

Mr. Rushton – aye
Mr. Taylor – aye
Mr. Jacob – aye
Mr. Pierucci – aye
Ms. Ramsey – aye

Mr. Richardson – aye
Mr. Sudbury – aye
Ms. Wood – aye
Ms. Townsend – aye

Mr. Mick Sudbury left the meeting.

The closed meeting convened at 4:37 p.m. with the following Trustees present: Ms. Barbara Townsend, Mr. John Taylor, Mr. Corey Rushton, Ms. Cindy Wood, Mr. Zach Jacob, and Mr. John Richardson, with Mr. Andy Pierucci and Ms. Dawn Ramsey joining remotely. Also present were Jacob Young, General Manager; Shazelle Terry, Chief Operating Officer; Ben Stanley, General Counsel; David Martin, Chief Financial Officer; Shane Swensen, Director of Engineering and Water Development; Travis Christensen, Engineering Group Leader; and Mindy Keeling, Executive Assistant.

No votes or actions were taken during the closed meeting.

Open Meeting

The open meeting was reconvened at 5:13 p.m.

**Consider
authorization to
award a construction
contract for the 2026
Distribution Pipeline
Replacement –
Millcreek Area**

Mr. Swensen said bids were received for a construction contract for the replacement of approximately 8,800 feet of aging cast iron pipe in the Millcreek area. He noted that the existing pipes, installed in the 1950's and 1960's, are reaching the end of their service life and experiencing frequent breaks. This project will replace the cast iron pipe with PVC pipe as well as new fire hydrants, valves, meter setters, and boxes. Roadway restoration will take place in areas impacted by construction. Several bids were received, with Cody Ekker Construction as the lowest responsible and responsive bid. Mr. Swensen recommended awarding a construction contract for the 2026 Distribution Pipeline Replacement – Millcreek Area to Cody Ekker Construction in the amount of \$3,486,875.

Mr. Rushton called for a motion on the recommendation. Mr. John Richardson moved to award the construction contract to Cody Ekker Construction for the 2026 Distribution Pipeline Replacement – Millcreek Area in the amount of \$3,486,875. Following a second by Ms. Barbara Townsend, the motion was approved by those present as follows:

Mr. Rushton – aye
Mr. Taylor – aye
Mr. Jacob – aye
Mr. Pierucci – aye
Ms. Ramsey – aye

Mr. Richardson – aye
Mr. Sudbury – not present
Ms. Wood – aye
Ms. Townsend – aye

Adjourn

Mr. Rushton called for a motion to adjourn. Mr. John Taylor moved to adjourn. Following a second by Mr. John Richardson, the meeting adjourned at 5:16 p.m.

Corey L. Rushton, Chair of the Board of Trustees

Jacob C. Young, District Clerk

2025 WATTSMART BUSINESS DEMAND RESPONSE PARTICIPATION

Rocky Mountain Power Wattsmart Business Demand Response – Jordan Valley Water Conservancy District – Big Check Presentation.

8/10/2026

Rocky Mountain Power Demand Response pays companies for their ability to reduce energy use in response to grid emergencies

Demand response is a simple and cost-effective resource for balancing **supply** and **demand** on the electricity grid

- Curtailing usage during grid emergencies is a **cost-effective alternative** to building more power plants
- Grid emergencies can be due to extreme weather, wholesale price spikes, or unexpected system issues

Wattsmart Business Demand Response Program Overview:

- **Rocky Mountain Power Wattsmart Demand Program offers its Commercial and Industrial demand response program offers customer incentive payment for participating in a program that:**
 - Optimizes energy use
 - Provides customer with incentives during high demand
 - Helps keep prices low
 - Improve grid resiliency
- **The program is designed to help customers maximize their payment while ensuring minimum disruption to their operations.**

Customer 2025 Incentive Payment

- Jordan Valley water conservancy joined the Wattsmart Business Demand Response program in February of 2025.
- The customer participated
 - All 10 events for the 7-Minute event notice product
 - An average of 25 minutes for contingency events were called in 2025
 - Customer's 2025 Demand Response earnings were \$94,498.82

¹ The City of South Salt Lake contract is based on a fiscal year. All other contracts are based on a calendar year.

² Retail deliveries are finalized after billing. Preliminary estimates using AMI data are made for the month previous to today.

³ Contract amount is minimum purchase plus remediated water.

⁴ Water treated and transported for MWDSLS by JVWCD is delivered to Salt Lake City at 2100 South.

⁵ District Use (Non-revenue) includes water consumed in breaks, reservoir washing, fires, irrigation and facility potable water.

⁶ Willow Creek Country Club average annual usage is estimated at 350 acre-feet.

Water Quality Update

Pharmaceutical Sampling Update

What are PPCPs?

Pharmaceuticals and personal care products (PPCPs) include a diverse group of products including, but not limited to, prescription and over-the-counter drugs, veterinary drugs, fragrances, lotions and cosmetics.

Why do we care about them in our watershed?

- They enter the environment from human activity; bathing, shaving, swimming, etc.
- Veterinary drug use, including hormones and antibiotics.
- Improper disposal of pharmaceuticals and over-the-counter drugs (e.g. flushing down the sink or toilet).
- Discharges from manufacturing processes and improper commercial disposal.
- The release of these chemicals into the environment has likely been occurring since the chemicals have been manufactured. With the expansion of, and different uses of these chemicals in addition to improved analytical methods, it has enabled the detection of these chemicals in our waters at very low concentrations.

Sampling PPCPs

JVWCD, in partnership with the Provo River Watershed Council tests for a variety of PPCPs in our local watershed.

The schedule is as follows:

- 4 samples pre-irrigation season (usually in March depending on snow and access to sites in the watershed).
- 4 samples at the beginning of irrigation season (early May).
- 10 samples in the middle of summer (mid July).
- 4 samples before the end of irrigation season (end of September).
- Samples are intended to capture related flows in the irrigation canals that wastewater treatment plants discharge into, that eventually end up in Deer Creek Reservoir.

Sample Locations

To put it into perspective

Most contaminants that we traditionally test for have only been analyzed in milligrams per liter (or parts per million). With more advanced techniques we can detect them in nanograms per liter (parts per trillion).

One part per million is:

- 1 inch in 16 miles
- 1 minute in two years
- 1 cent in \$10,000
- 1 ounce of salt in 31 tons of potato chips
- 1 bad apple in 2,000 barrels of apples

One part per billion is:

- 1 inch in 16,000 miles
- 1 second in 32 years
- 1 cent in \$10,000,000
- 1 pinch of salt in 10 tons of potato chips
- 1 bad apple in 2,000,000 barrels of apples

One part per trillion is:

- 1 inch in 16 million miles (more than 600 times around the earth)
- 1 second in 320 centuries
- 1 grain of sugar in an Olympic sized pool
- 1 bad apple in 2 billion barrels

Results Summary

Summary of results collected since 2008. Very low detections, but something we want to continue to keep an eye on, especially with all the growth in the Provo River Watershed.

MEMBER AGENCY GRANT PROGRAM UPDATE**

August 12, 2026

Member Agency:		Draper City		
Project Schedule:		July 2025 - June 2026		
Project Cost:		\$53,800		
Program 1:	Water Efficiency Standards Implementation		Grant Funding Amount:	\$53,800
Description:	Funding for a Landscape Inspector position to assist in compliance with the Water Efficiency Standards. The duties include: review of new development landscape plans, ensuring landscape installation follows WES codes, performing field inspections, interpreting city policies, providing technical assistance, and providing guidance pertaining to landscapes.		Invoiced Amount:	\$43,051
	One invoice remaining		Percent Reimbursed:	80%
Schedule:	July 2025 – Grant period begins July 2025 to June 2026 – WES enforcement June 30, 2026 – End of grant period		Total Reimbursed Amount:	\$43,051

Member Agency:	Granger-Hunter Improvement District		 GRANGER-HUNTER IMPROVEMENT DISTRICT
Project Schedule:	July 2025 – June 2026		
Project Cost:	\$143,000 (\$84,000 JVWCD, \$59,000 GHID)		
Program 1:	Leak Detection, Pinpointing, and Repair	Grant Funding Amount:	\$64,000
Description:	GHID would like to use a leak detection company to find new leaks in a portion of the system. Documentation for this project will include leak locations, repair dates, and estimated gallons saved. Customers will be educated on how to use the Customer Portal so they can track their daily water use and set alarms to receive notifications if new leaks occur.	Invoiced Amount:	\$64,000
Funding Match:	JVWCD 80%, GHID 20%	Percent Reimbursed:	100%
Schedule:	January 2026 – May 2026	Total Reimbursed Amount:	\$64,000

Program 2:	Customer Water Usage Portal	Grant Funding Amount:	\$7,200
Description:	GHID is preparing to replace its current customer portal, which will be discontinued by the meter manufacturer after August 2026. While the meter manufacturer will continue to provide hourly water usage data, customers will lose access to the portal unless a new solution is implemented. The proposed Customer Water Usage Portal will restore and enhance this access, integrating with GHID's existing billing software to provide a seamless, user-friendly experience. This initiative is critical for enabling real-time leak detection, customizable alerts, and proactive water conservation.	Invoiced Amount:	\$7,200
Funding Match:	JVWCD 80%, GHID 20%	Percent Reimbursed:	100%
Schedule:	July 2025 – Begin vendor evaluation April 2026 – Begin phased rollout May 2026 – Launch campaign	Total Reimbursed:	\$7,200

Program 3:	Continuous Flow Program	Grant Funding Amount:	\$9,600
Description:	The Continuous Flow Program is a proactive water audit initiative designed to help residential, commercial, industrial, and institutional customers detect and address potential leaks. By leveraging Advanced Metering Infrastructure (AMI) data, GHID will identify accounts with continuous or unusually high water flow, often a sign of undetected leaks, and notify customers through their preferred communication method.	Invoiced Amount:	\$9,600
Funding Match:	JVWCD 80%, GHID 20%	Percent Reimbursed:	100%
Schedule:	July 2025 – May 2026: Acquire staff, purchase, and distribute materials.	Total Reimbursed:	\$9,600

Program 4:	Conservation Calendars and Information Packets	Grant Funding Amount:	\$1,600
Description:	GHID would like to produce and provide a 2025 Conservation Calendar and Customer Information Packet in English and Spanish with waterwise tips for customers and information on how to enroll in the Customer Portal, where daily water usage can be monitored.	Invoiced Amount:	\$1,600
Funding Match:	JVWCD 40%, GHID 60%	Percent Reimbursed:	100%
Schedule:	August 2025 - Design conservation calendar September 2025 – Obtain printing quotes October 2025 - Begin distribution	Total Reimbursed:	\$1,600
 GHID Conservation Calendars			

Program 5:	Conservation Promotional Materials	Grant Funding Amount:	\$1,600
Description:	To better build conservation awareness, GHID would like to enhance education efforts at community events and directly to customers. Promotional materials will include better conservation signage, literature, swag items, and water-saving tools to be handed out.	Invoiced Amount:	\$1,600
Funding Match:	JVWCD 40%, GHID 60%	Percent Reimbursed:	100%
Schedule:	January 2026 to May 2026 – Purchase and distribute promotional materials	Total Reimbursed:	\$1,600
 Granger-Hunter Promotional Materials			

Member Agency:	Herriman City		
Project Schedule:	July 2025 - June 2026		
Project Cost:	\$78,200		
Program 1:	Water Efficiency Standards Implementation	Grant Funding Amount:	\$63,000
Description:	This grant provides funding for the Water Conservation Coordinator position to assist in compliance with the Water Efficiency Standards. The duties include developing new landscape plan reviews and inspections, designing team members for all City landscape projects, public education, and performing customer water audits.	Invoiced Amount:	\$42,224
		Percent Reimbursed:	67%
Schedule:	July 2025 – Grant period begins June 2026 – End of grant period	Total Reimbursed:	\$42,224

Member Agency:	Kearns Improvement District		
Project Schedule:	July 2025 – June 2026		
Project Cost:	\$72,595		
Program 1:	Water Efficiency Standards Implementation	Grant Funding Amount:	\$65,500
Description:	This funding will support KID’s efforts to enhance compliance with WES through staffing, policy updates, technology integration, and customer service improvements. The funding will enable KID to: Strengthen compliance with WES requirements in new developments; Improve internal processes for plan review, inspection, and enforcement; Enhance customer engagement and transparency in the development approval process; and modernize tools and standards to align with JVWCD water efficiency criteria. This funding will significantly enhance KID’s capacity to implement and enforce water efficiency standards, contributing to sustainable water use and responsible development practices in the service area.	Invoiced Amount:	\$65,500
		Percent Reimbursed:	100%
Schedule:	July 1, 2025 – Grant period begins June 30, 2026 – End of grant period	Total Reimbursed:	\$65,500

Member Agency:	Magna Water District		
Project Schedule:	October 2025 - January 2026		
Project Cost:	\$27,678 (\$11,071 JVWCD, \$16,607 Magna)		
Program 1:	Conservation Garden Enhancement	Grant Funding Amount:	\$11,071
Description:	This project is for consulting services to create an enhancement plan for the conservation demonstration garden at the Magna Water District's administration building. The project will focus on enhancing visibility from the parking lot, upgrading path lighting, expanding plant diversity with additional water-conserving species, improving plant signage, creating a central information/kiosk center, and incorporating shaded seating areas for the public and visitor use.	Invoiced Amount:	\$9,928
Funding Match:	JVWCD 40%, Magna 60%	Percent Reimbursed:	90%
Schedule:	October 2025 – Project kickoff November 2025 – Concept design December 2025 – Design development January 2026 – Final plan	Total Reimbursed:	\$9,928

Member Agency:	Riverton City		
Project Schedule:	July 2025 - June 2026		
Project Cost:	\$56,320		
Program 1:	Water Efficiency Standards Implementation	Grant Funding Amount:	\$56,320
Description:	Funding for a Water Quality and Conservation Specialist to assist in compliance with the Water Efficiency Standards. The intent of this position is to manage Riverton’s water conservation program. The duties include: public awareness, conservation services, recommending that all new landscaping comply with city waterwise standards, reviewing CII and residential landscapes, and enforcing landscape requirements through on-site visits.	Invoiced Amount:	\$56,320
		Percent Reimbursed:	100%
Schedule:	July 2025 – Grant period begins June 2026 – End of grant period	Total Reimbursed:	\$56,320

Member Agency:	City of South Jordan	
Project Schedule:	July 2025 - June 2026	
Project Cost:	\$86,000 WES + \$86,000 Rebate Programs	

Program 1:	Water Efficiency Standards Implementation	Grant Funding Amount:	\$86,000
Description:	The City of South Jordan proposes to use a staff position in the planning department for duties associated with the Water Efficiency Standards. It is anticipated that all the duties will be directly associated with the Water Efficiency Standards. The specific duties for the position will include reviewing landscaping plans, working with builders for residential landscapes, inspecting complete landscapes, verifying code compliance with Water Efficiency Standards, documenting compliance, and coordinating commercial landscape projects.	Invoiced Amount:	\$30,335
		Percent Reimbursed:	35%
Schedule:	July 2025 – Grant period begins June 2026 – End of grant period	Total Reimbursed:	\$30,335

Program 2:	Toilet Rebate Program	Grant Funding Amount:	\$4,000
Description:	South Jordan will provide a rebate of up to \$100 to residents who replace their pre-1992 toilets with a new high-efficiency toilet (HET) that uses 1.28 gallons or less per flush.	Invoiced Amount:	\$1,360
Funding Match:	JVWCD 80%, SJC 20%	Percent Reimbursed:	34%
Schedule:	July 1, 2025, to June 30, 2026 – Ongoing rebates throughout the year.	Total Reimbursed:	\$1,360

Program 3:	Indoor Water Fixtures Rebate Program	Grant Funding Amount:	\$2,400
Description:	South Jordan will provide a rebate of up to \$100 to residents for purchasing and installing faucets and showerheads with the WaterSense logo.	Invoiced Amount:	\$273
Funding Match:	JVWCD 80%, SJC 20%	Percent Reimbursed:	11%
Schedule:	July 1, 2025, to June 30, 2026 – Ongoing rebates throughout the year.	Total Reimbursed:	\$273

Program 4:	Turf Conversion Rebate Program	Grant Funding Amount:	\$79,600
Description:	South Jordan will provide various landscape rebates, including rock mulch, drip irrigation, plants, curbing, and hardscape. To help accomplish this, JVVCD will provide the City with a rebate of \$1.00 per square foot of turf removed and replaced with waterwise landscaping.	Invoiced Amount:	\$77,967
Funding Match:	JVVCD 80%, SJC 20%	Percent Reimbursed:	98%
Schedule:	July 1, 2025, to June 30, 2026 – Ongoing rebates throughout the year.	Total Reimbursed:	\$77,967
 Turf Conversion Projects in South Jordan			

Member Agency:	City of South Salt Lake		
Project Schedule:	July 2025 - June 2026		
Project Cost:	\$26,482 (\$21,186 JVWCD, \$5,296 SSL)		
Program 1:	Leak Messaging and Water Billing Transparency	Grant Funding Amount:	\$21,186
Description:	The City of South Salt Lake proposes implementing a customer leak monitoring and notification software system to enhance conservation efforts by enabling automated alerts to customers when abnormal water usage is detected. Key staff across communications, finance, and public works will oversee the program. Success will be measured through engagement metrics, water usage data, and customer feedback.	Invoiced Amount:	\$21,186
Funding Match:	JVWCD 80%, SSL 20%	Percent Reimbursed:	100%
Schedule:	July 2025 – Initial setup August 2025 – Training and pilot testing October 2025 – Public launch, onboarding June 2026 – Program review/reporting	Total Reimbursed:	\$21,186

COMMUNITY ENGAGEMENT ACTIVITIES

JORDAN VALLEY WATER CONSERVANCY DISTRICT

**CONSIDER APPROVAL OF A WATER CONSERVATION FUNDING AGREEMENT
WITH GRANGER-HUNTER IMPROVEMENT DISTRICT**

August 12, 2026

Account Number: Conservation Programs - 5670

Budgeted: Yes

Fund: O & M

Grant Amount (JVWCD'S Portion)	Member Agency Contribution	Total
\$84,000	\$31,500	\$115,500

Summary:

Granger-Hunter Improvement District (GHID) is proposing to combine its funds with JVWCD grant funds for the following purposes:

Continuous Flow/Customer Water Usage Portal Program

In 2025, GHID initiated its Continuous Flow Program to identify potential customer leaks and improve response times. During the program's first year, 628 customers were notified of continuous water use, resulting in 407 customers correcting confirmed leaks or ongoing water loss concerns. These early results demonstrated the value of providing customers with timely water use information and leak notifications.

Last year's (2025-2026) Member Agency Grant supported the selection and initial implementation of a new Customer Water Usage Portal after GHID learned that its existing Sensus customer portal would be discontinued. Since then, GHID has completed a competitive procurement process, selected a new vendor, and finalized implementation planning.

This measure builds on that initial investment by completing implementation of the new portal and expanding GHID's conservation capabilities. The new portal will provide customers with near real-time water use information, continuous flow notifications, usage alerts as customers approach higher billing tiers, enhanced conservation messaging, and improved customer access through web and mobile applications. These tools will enable customers to identify leaks sooner, better understand their water use, and make informed decisions that reduce unnecessary water consumption.

Funding requested under this measure will support the remaining implementation costs, annual software licensing, and support costs of the new Customer Water Usage Portal during the 2026–2027 grant period. GHID will be contributing significant staff resources to implement the system, educate customers, and maximize adoption.

Leak Detection Equipment

GHID plans to transition to an in-house, year-round leak detection program through the purchase of listening equipment and data loggers. This investment will improve system efficiency, reduce water loss, and allow for more proactive leak identification and response.

Water System Audit by Zone

Implement an automated, pressure zone–level reconciliation of water production and billed consumption to pinpoint and quantify non-revenue water across the system. This AWWA-aligned approach enables GHID to move beyond system-wide estimates and systematically target the highest-loss zones for intervention. By distinguishing real versus apparent losses, we can prioritize the next best investments in leak detection, metering accuracy, and operations.

Tiered Rate Study

With the help of a consultant, develop a tiered rate structure to promote water conservation while ensuring long-term revenue stability. This study will align pricing signals with usage patterns, encouraging efficient consumption and reducing peak demand pressures. By balancing affordability, cost recovery, and conservation objectives, GHID can strengthen revenue stability and incentivize conservation of limited water resources.

Promotional and Educational Conservation Materials

Funding would support a variety of conservation outreach and educational materials designed to promote water efficiency and community engagement. Materials may include event giveaways, school education displays, yard signs, sprinkler test cups, videos, community event support such as Truck-or-Treat activities, and grass seed distribution.

Conservation Calendars, Information Packets, and Conservation Art Contest

Due to the popularity of the conservation calendars featuring local water conservation artwork, GHID would like to continue the program in 2027. Funding would also support updated customer information packets and prizes for art contest participants to encourage continued community engagement in water conservation.

Spray Nozzles and Drip Irrigation Kits

GHID has previously provided spray nozzles to new customers to promote water conservation and efficient watering practices. Requested funds will be used to replenish this supply and to purchase drip kits that will be offered to customers who express interest in using the materials to save water. Verification of installation, either through pictures or on-site visits, will be incorporated into the campaign.

Recommendation:

Approve award of \$84,000 to Granger-Hunter Improvement District for water conservation funding.

MEMBER AGENCY WATER CONSERVATION FUNDING AGREEMENT

This Agreement is made and entered into as of July 1, 2026, (the “Effective Date”), by and between the Jordan Valley Water Conservancy District, a Utah special district (“District”), and Granger-Hunter Improvement District, a Utah special district (“Member Agency”).

RECITALS:

- A. The District desires to provide funding assistance to the Member Agency for a water conservation project within the Member Agency’s retail service area relating to leak detection, water system auditing, tiered rate study, and promotional materials (the “Project”);
- B. The Member Agency wishes to obtain funding assistance from the District and represents that it has met the eligibility requirements; and,
- C. The Member Agency has submitted to the District a proposal outlining the Project and requesting funding assistance, and the District is willing to provide funding assistance, consistent with the terms of this Agreement.

TERMS:

The parties agree as follows:

- 1. Project Description. A description of the Project to be completed by the Member Agency is set forth in attached Exhibit A.
- 2. Project Schedule. The Project shall be completed by the Member Agency in accordance with the schedule set forth in attached Exhibit A, notwithstanding any other provision or Exhibit of this Agreement to the contrary.

3. Project Administration and Correspondence.

(a) The person designated to administer the Project and to act as the chief contact for the Member Agency is:

Michelle Ketchum, Director of Administrative Services
Granger-Hunter Improvement District
288 South 3600 West
West Valley City, Utah 84119

(b) The person designated to represent the District in connection with this Agreement is:

Courtney Brown, Conservation Division Manager
Jordan Valley Water Conservancy District
8275 South 1300 West
West Jordan, Utah 84088

4. Eligibility for Project Funding. The Member Agency represents it has:

(a) Adopted, by formal resolution, a water conservation goal of reducing per capita water use in its service area by at least twenty-five percent (25%) by year 2026, using year 2000 as a baseline year for comparison purposes; and,

(b) Complied with the Utah Water Conservation Plan Act, Utah Code Ann. § 73-10-32, and has filed a water conservation plan with the State of Utah, Division of Water Resources.

5. Member Agency Responsibilities and Ownership.

(a) The Member Agency and/or its representatives shall provide all labor, services, supplies, and materials to implement and complete the Project, including but not limited to administration, promotion, marketing, management, data collection, analysis, and reporting.

(b) All materials and supplies necessary to implement and complete the Project shall be the exclusive property of the Member Agency. The District shall have

no ownership, right, title, security interest, or other interest in any Project facilities, materials, or supplies, nor in any rights, duties, or responsibilities for operation or maintenance thereof.

(c) The Member Agency shall comply with all applicable federal, state, and local requirements to implement and complete the Project.

(d) The Member Agency shall be solely responsible for the performance of its staff and/or representatives in complying with the terms of this Agreement, and for the proper allocation of funds received from the District for implementing and completing the Project.

(e) The Member Agency shall timely prepare and submit invoices and reports to the District as further described herein.

(f) The Member Agency shall timely pay its share of the costs of the Project.

6. Cost Estimate and Funding.

(a) The funds to be provided by the District to the Member Agency shall not exceed Eighty-Four Thousand and 00/100 dollars (\$84,000.00).

(b) The costs for the Project to be paid by the District and by the Member Agency are set forth in attached Exhibit A. All costs greater than those shown in Exhibit A, which are necessary to implement and complete the Project pursuant to this Agreement, if any, shall be paid by the Member Agency. The Member Agency shall pay no less than twenty percent (20%) of the total cost of the Project.

7. Invoicing Requirements.

(a) The Member Agency shall invoice the District on a quarterly basis pursuant to the following schedule:

QUARTERLY BILLING PERIOD	INVOICE DUE DATE
January 1-March 31	April 20
April 1-June 30	July 20
July 1-September 30	October 20
October 1-December 31	January 20

(b) Invoices shall be sufficiently detailed to allow for review and approval by the District and each shall include the following: a cover letter indicating the billing period; a detailed breakdown of the costs submitted for reimbursement, including man hours and billing rates; documentation supporting the invoice, such as invoices for supplies, consulting services, etc.; and, an accounting of the amount(s) previously invoiced with respect to the total funding amount provided under this Agreement. The final invoice for the Project, or a component of the Project, shall provide information and documentation sufficient to demonstrate that it has been completed in accordance with the requirements and conditions of this Agreement.

8. Periodic Meetings. The District, at its discretion, may request periodically a meeting for review of the Member Agency's progress toward implementation and completion of the Project, including an initial meeting prior to commencement of the Project.

9. Reporting Requirements.

(a) Beginning with 2026, and for five (5) consecutive years following completion of the Project, the Member Agency shall provide to the District an annual calculation of per capita water uses within its retail service area. The calculation shall include an estimate of the population served and the volume of water delivered. This information shall be provided to the District by February 15 following the specific calendar year for which the report is made.

(b) If records are available, the Member Agency shall provide to the District, on or before July 1, 2027, the information requested in subparagraph 9 (a) for each calendar year between 2000 and 2026.

(c) Within forty-five (45) days following termination of this Agreement and prior to final payment, the Member Agency shall submit to the District a final, written report, including a summary of the Project; problems/challenges encountered; customer responses; Project benefits; a breakdown of final Project costs; and an evaluation regarding the effectiveness of the Project.

(d) If a retail customer of the Member Agency receives and installs a water-conserving device, fixture, or equipment as part of the Project, the Member Agency shall provide to the District the customer's water use information for three (3) full years prior to and following installation of the device, fixture, or equipment.

(e) The provisions of this paragraph 9 shall survive expiration or termination of the term of the Agreement.

10. Term. The term of this Agreement shall commence on the Effective Date, and it shall expire without further notice or condition on June 30, 2027, except all reporting obligations required by this Agreement shall survive its expiration or earlier termination for five (5) consecutive years.

11. Termination. Either party may terminate this Agreement upon sixty (60) days written notice to the other party.

12. Indemnification. The Member Agency shall indemnify, hold harmless, and defend the District, its Trustees, officers, employees, and agents against any claim or asserted liability arising out of the Member Agency's actions, either willful or negligent, or the actions of the Member Agency's officers, employees, or agents, in providing labor,

services, supplies, and materials pursuant to this Agreement, including any losses related to any claim made, whether or not court action is filed, and will include attorney fees and administrative and overhead costs related to, or arising out of, such claim or asserted liability.

13. Notices. All notices, requests, demands, and other communications required or allowed by this Agreement shall be in writing and shall be given by personal delivery or by certified mail, with return receipt requested, to the following addresses or to such other addresses as the parties may designate in writing:

If to District, to:

Jordan Valley Water Conservancy District
Attn: General Manager
8215 South 1300 West
West Jordan, Utah 84088

If to Member Agency, to:

Granger-Hunter Improvement District
Attn: Michelle Ketchum, Director of Administrative Services
288 South 3600 West
West Valley City, Utah 84119

Notice shall be effective on the date it is received by the other party.

14. Amendment. This Agreement may be amended only by written instrument signed by both parties.

15. Binding Nature. All of the grants, covenants, terms, provisions, and conditions in this Agreement shall be binding upon and inure to the benefit of the successors and permitted assigns of the parties.

16. Assignment. The Member Agency shall not assign this Agreement or any of its rights under this Agreement without the prior written consent of the District. The District may assign this Agreement and/or any of its rights under this Agreement.

17. Whole Agreement. This Agreement, including exhibits, constitutes the entire agreement of the parties and supersedes all prior understandings, representations, or agreements of the parties regarding the subject matter in this document.

18. Authorization. The Member Agency represents and warrants that it has authority to enter into this Agreement. In addition, each individual executing this Agreement does hereby represent and warrant that he or she has been duly authorized to sign this Agreement in the capacity and for the entities shown.

19. Miscellaneous. The parties shall perform those acts and/or sign all documents required by this Agreement, and which may be reasonably necessary to effectuate the terms of this Agreement.

PROJECT DESCRIPTION, SCHEDULE, AND COST

GRANGER-HUNTER IMPROVEMENT DISTRICT

Measure 1: Continuous Flow/Customer Water Usage Portal Program Extension

Description: Granger-Hunter Improvement District (GHID) seeks funding to complete implementation of a new Customer Water Usage Portal and expand its successful Continuous Flow Program to provide customers with timely, actionable water-use information. In 2025, GHID's Continuous Flow Program notified 628 customers of continuous water use, resulting in 407 customers correcting confirmed leaks or ongoing water loss concerns. These results demonstrated that proactive customer notifications can significantly reduce water waste and improve customer awareness.

Building on last year's Member Agency Grant, the proposed project will complete deployment of the new Customer Water Usage Portal, providing customers with near real-time water-use data, automated leak and continuous flow notifications, customized usage alerts, conservation messaging, and convenient web and mobile access. Together with ongoing outreach efforts, this program will help customers identify leaks sooner, reduce unnecessary water consumption, improve customer service, and strengthen GHID's long-term conservation goals.

Why This Program Is Needed: In 2025, GHID launched its Continuous Flow Program to proactively identify potential customer leaks and improve response times. During the program's first year, 628 customers were notified of continuous water use, resulting in 407 customers correcting confirmed leaks or ongoing water loss concerns. These results demonstrated that providing customers with timely water-use information leads to meaningful conservation outcomes and reduced water waste.

Despite these successes, many customers remain unaware of leaks until they receive a high water bill. Manual notification efforts are effective but labor-intensive, requiring significant staff time to review reports, contact customers, and follow up on unresolved issues.

In addition, GHID's previous Sensus customer portal was underutilized and has since been discontinued, creating the need for a modern, customer-friendly platform that provides improved access to water-use information and automated notifications.

The conservation opportunity remains substantial. Continuous flow averages approximately 20 gallons per hour per affected meter, representing an estimated 432,000 gallons of water loss per day, or more than 157 million gallons annually. Expanding automated customer alerts and self-service monitoring tools will help customers identify and resolve water waste more quickly.

Key Features & Benefits:

- Near Real-Time Leak Detection – Detects continuous flow from sources such as running toilets, irrigation issues, or mainline leaks, allowing customers to address problems before significant water loss occurs.
- Automated Customer Notifications – Alerts customers when abnormal usage patterns or continuous flow are detected, helping identify leaks sooner and reducing reliance on manual outreach.
- Customizable Usage Alerts – Customers can establish personalized thresholds and receive notifications as they approach higher billing tiers, helping them better manage monthly water consumption.
- User-Friendly Access – Integrated with GHID's billing software to provide seamless access through web and mobile applications without requiring separate credentials.
- Enhanced Conservation Messaging – Provides customers with water-saving tips, educational resources, and consumption insights that encourage efficient water use.
- Multiple Communication Methods – Supports outreach through portal notifications, email, text messages, phone calls, and postcards to ensure all customers receive important water-use information.
- Courtesy Field Support – Technician visits can be provided when customers need assistance locating or resolving leaks.

Program Goals:

- Expand Leak Detection and Notification Efforts – Provide timely notifications to all affected customers rather than only those identified through manual review.
- Improve Customer Water Awareness – Give customers direct access to near real-time water use information and consumption trends.
- Enhance Customer Communication – Deliver alerts and conservation messages through multiple channels.
- Support Water Conservation – Encourage early leak repairs and informed water management decisions that reduce unnecessary consumption.
- Increase Customer Engagement – Improve access to usage data through modern web and mobile applications.
- Bridge the Digital Divide – Continue providing traditional notification methods for customers who may not utilize digital tools.

Implementation Plan:**1. Complete Customer Water Usage Portal Implementation**

Last year's Member Agency Grant supported the selection and initial implementation of a new Customer Water Usage Portal after GHID learned its existing Sensus customer portal would be discontinued. Since then, GHID has completed a competitive procurement process, selected a vendor, and finalized implementation planning.

Funding through this measure will support completion of the portal implementation, including system configuration, customer onboarding, software licensing, and ongoing support during the 2026-2027 grant period.

2. Baseline Outreach

- Review accounts currently identified with continuous flow conditions.
- Notify customers through their preferred communication method, including postcards, phone calls, emails, text messages, and portal notifications.
- Provide educational materials and conservation guidance.
- Offer courtesy technician visits when leak investigation assistance is needed.

3. Ongoing Monitoring and Notification

- Compare daily continuous flow reports against the existing customer notification database.
- Automatically notify customers through the portal when continuous flow is detected.
- Continue manual outreach for customers who are not enrolled in the portal or who require additional assistance.
- Track customer responses and conservation outcomes to measure program effectiveness.

4. Customer Education and Adoption

GHID will dedicate significant staff resources to ensure successful implementation and customer participation. Efforts will include:

- Customer enrollment support
- Educational outreach campaigns
- Portal training and tutorials
- Conservation awareness messaging
- Technical assistance for portal users

5. Intern and Staff Support

- Extend employment of GHID's summer intern to support implementation activities.
- Assist with customer outreach, account monitoring, data review, and follow-up coordination.
- Support adoption and education efforts during the portal rollout.

Promotion & Adoption Strategy:

To maximize customer participation and conservation benefits, GHID will implement a comprehensive outreach campaign that includes:

- Email campaigns promoting portal enrollment and key features.
- Social media and website content highlighting leak detection tools, conservation resources, and customer success stories.
- Targeted outreach to high-usage customers and customers with prior continuous flow concerns.

- Instructional videos, tutorials, and user guides demonstrating how to monitor water use and configure alerts.
- Postcards and direct mail campaigns to engage customers who may not routinely access digital communications.
- Ongoing conservation messaging that reinforces efficient water-use practices.

Communication Strategy:

- Primary Methods: Portal notifications, email alerts, and postcards.
- Secondary Methods: Text messages and phone calls.
- Follow-Up Support: Courtesy technician visits and individualized customer assistance for unresolved issues.

Staff Involved:

- Summer Intern – Implementation support, customer outreach, and follow-up coordination
- Michelle Ketchum – Director of Administrative Services
- Krista Barnes – Customer Service Supervisor and customer service staff
- Dustin Soter – Meter Supervisor and meter staff
- Marinda Miller – Data Auditor
- Justin Gallegos – IT Director

Funding Request & JVVCD Contribution:

Funding requested under this measure will support the remaining implementation costs of the new Customer Water Usage Portal, annual software licensing, and ongoing support costs during the 2026-2027 grant period.

GHID will provide substantial in-kind support through staff time dedicated to implementation, system administration, customer education, outreach efforts, and ongoing program management. This investment will help ensure successful adoption and maximize conservation benefits throughout JVVCD.

Complementary Efforts:

The Customer Water Usage Portal and Continuous Flow Program work together to create a comprehensive customer engagement and water conservation strategy. The Continuous Flow Program has already demonstrated measurable success, with 407 customers correcting confirmed leaks following notification efforts in 2025. The new portal expands upon those results by providing automated alerts, near real-time consumption information, and convenient customer access to water-use data.

Together, these initiatives will improve customer service, reduce water waste, increase customer awareness, and strengthen GHID's long-term water conservation efforts.

Funding Tier: Tier 1

Schedule for Implementation:

- June 2026 – Begin crafting the new water usage portal structure.
- July - August 2026 – Train GHID staff on the new portal and the new resources
- August 2026 – May 2027 - Roll out the new portal and begin to engage customers and encourage usage access through the JVVCD website, the Xpress Bill Pay portal, and the Water Usage Portal app.

Cost:

- JVVCD 80%: \$27,200
- GHID 20%: \$6,800
- Total: \$34,000

Measure 2: Leak Detection Equipment

Description: GHID plans to transition to an in-house, year-round leak detection program through the purchase of listening equipment and data loggers. This investment will improve system efficiency, reduce water loss, and allow for more proactive leak identification and response.

Funding Tier: Tier 1

Schedule for Implementation:

- July - August 2026 – Obtain bids.
- September 2026 - May 2027 – Purchase equipment and implement program. Track data and make repairs.

Cost:

- JVVCD 80%: \$25,600
- GHID 20%: \$6,400
- Total: \$32,000
 - o Acoustic Listening Devices (2 sets): \$12,000
 - o Data Loggers: \$20,000

Measure 3: Water System Audit by Zone

Description: Implement an automated, pressure zone-level reconciliation of water production and billed consumption to pinpoint and quantify non-revenue water across the system. This AWWA-aligned approach enables GHID to move beyond system-wide estimates and systematically target the highest-loss zones for intervention. By

distinguishing real versus apparent losses, we can prioritize the next best investments in leak detection, metering accuracy, and operations. The result is a disciplined, high-ROI framework that advances both fiscal responsibility and community water stewardship.

Funding Tier: Tier 1

Schedule for Implementation:

- July - September 2026 – Prepare a cost-benefit analysis to determine the most effective approach for completing the project.
- October 2026 – Implement the plan.

Cost:

- JVVCD 80%: \$16,400
- GHID 20%: \$4,100
- Total: \$20,500

Measure 4: Tiered Rate Study

Description: Through the help of a consultant, develop a tiered rate structure to promote water conservation while ensuring long-term revenue stability. This study will align pricing signals with usage patterns, encouraging efficient consumption and reducing peak demand pressures. By balancing affordability, cost recovery, and conservation objectives, GHID can strengthen revenue stability, incentivize conservation and reinforce community stewardship of limited water resources.

Funding Tier: Tier 2

Schedule for Implementation:

- July 2026 – Gather data, usage trends, and industry developments
- November 2026 – Begin solicitation process
- December 2026 – Selection and kickoff
- June 2027 – Completion of introductory analysis

Cost:

- JVVCD 60%: \$6,000
- GHID 40%: \$4,000
- Total: \$10,000

Measure 5: Promotional and Educational Conservation Materials

Description: Funding would support a variety of conservation outreach and educational materials designed to promote water efficiency and community engagement. Materials may include event giveaways, school education displays, yard signs, sprinkler test cups, videos, community event support such as Truck-or-Treat activities, and grass seed distribution.

Funding Tier: Tier 3

Schedule for Implementation:

- July 2026 – May 2027 – Purchase and distribute promotional materials

Cost:

- JVVCD 40%: \$4,000
- GHID 60%: \$6,000
- Total: \$10,000

Measure 6: Conservation Calendars, Information Packets, and Conservation Art Contest

Description: Due to the popularity of the conservation calendars featuring local water conservation artwork, GHID would like to continue the program in 2027. Funding would also support updated customer information packets and prizes for art contest participants to encourage continued community engagement in water conservation.

Funding Tier: Tier 3

Schedule for Implementation:

- September 2026 – Design conservation calendar
- November 2026 – Calendar printing and distribution
- December 2026 – Information packet update and printing
- Spring 2027 – Hold art contest and announce winners

Cost:

- JVVCD 40%: \$2,400
- GHID 60%: \$3,600
- Total: \$6,000

Measure 7: Spray Nozzles and Drip Irrigation Kits

Description: GHID has previously provided spray nozzles to new customers to promote water conservation and efficient watering practices. Requested funds will be used to replenish this supply and to purchase drip kits that will be offered to customers who express interest in using the materials to save water. Verification of installation, either through pictures or on-site visits, will be incorporated into the campaign.

Funding Tier: Tier 1

Schedule for Implementation:

- July 2026 – May 2027 – Purchase and distribute materials; educate customers

Cost:

- JVVCD 80%: \$2,400
- GHID 20%: \$600
- Total: \$3,000

Total JVVCD: \$84,000

Total Granger-Hunter: \$31,500

Total of all Projects: \$115,500

JORDAN VALLEY WATER CONSERVANCY DISTRICT

**CONSIDER APPROVAL OF A WATER CONSERVATION FUNDING
AGREEMENT WITH THE CITY OF SOUTH JORDAN**

August 12, 2026

Account Number: Conservation Programs - 5670

Budgeted: Yes

Fund: O & M

Grant Request (JVWCD Portion)	Member Agency Contribution	Total
\$86,000	\$21,500	\$107,500

Summary:

The City of South Jordan is seeking grant funding assistance from JVWCD for the following purposes:

Toilet Rebate Program

South Jordan will provide a rebate of \$100 to residents who replace their pre-1992 toilet with a new High Efficiency Toilet (HET) which uses 1.28 gallons or less per flush. This ongoing program will be advertised through social media, the city's conservation website, mailers, and the water bill. A rebate form will be made available to residents.

Indoor Water Fixtures Rebate Program

South Jordan will provide a rebate of up to \$100 for residents who purchase and install faucets and showerheads with the WaterSense logo. Only residents with homes built prior to 2005 will be eligible for the rebate. Requirements also include a rebate application, receipt, and pictures. City staff will verify proper installation.

Turf Conversion Rebate Program

South Jordan will provide various landscape rebates including rock mulch delivery, drip irrigation kits, waterwise plant rebates, curbing rebates, and concrete/hardscape rebates. To help accomplish this, JVWCD will provide the City with a rebate of \$1.00 per square foot of turf removed and replaced with waterwise landscaping (up to 79,600 square feet during the grant cycle). City staff will administer the rebate programs, document the projects, and provide square footage to JVWCD for each project. To be eligible, projects must replace lawn with mulch and plants watered with drip irrigation or with hardscape. City staff will verify proper installation.

Recommendation:

Approve award of \$86,000 to the City of South Jordan for conservation rebate programs.

MEMBER AGENCY WATER CONSERVATION FUNDING AGREEMENT

This Agreement is made and entered into as of July 1, 2026, (the “Effective Date”), by and between the Jordan Valley Water Conservancy District, a Utah special district (“District”), and City of South Jordan, a Utah municipality (“Member Agency”).

RECITALS:

- A. The District desires to provide funding assistance to the Member Agency for a water conservation project within the Member Agency’s retail service area relating to rebate programs (the “Project”);
- B. The Member Agency wishes to obtain funding assistance from the District and represents that it has met the eligibility requirements; and,
- C. The Member Agency has submitted to the District a proposal outlining the Project and requesting funding assistance, and the District is willing to provide funding assistance, consistent with the terms of this Agreement.

TERMS:

The parties agree as follows:

- 1. Project Description. A description of the Project to be completed by the Member Agency is set forth in attached Exhibit A.
- 2. Project Schedule. The Project shall be completed by the Member Agency in accordance with the schedule set forth in attached Exhibit A, notwithstanding any other provision or Exhibit of this Agreement to the contrary.

3. Project Administration and Correspondence.

(a) The person designated to administer the Project and to act as the chief contact for the Member Agency is:

Connor Oswald, Water Conservation Coordinator
City of South Jordan
1600 West Towne Center Drive
South Jordan, Utah 84095

(b) The person designated to represent the District in connection with this Agreement is:

Courtney Brown, Conservation Division Manager
Jordan Valley Water Conservancy District
8275 South 1300 West
West Jordan, Utah 84088

4. Eligibility for Project Funding. The Member Agency represents it has:

(a) Adopted, by formal resolution, a water conservation goal of reducing per capita water use in its service area by at least twenty-five percent (25%) by year 2026, using year 2000 as a baseline year for comparison purposes; and,

(b) Complied with the Utah Water Conservation Plan Act, Utah Code Ann. § 73-10-32, and has filed a water conservation plan with the State of Utah, Division of Water Resources.

5. Member Agency Responsibilities and Ownership.

(a) The Member Agency and/or its representatives shall provide all labor, services, supplies, and materials to implement and complete the Project, including but not limited to administration, promotion, marketing, management, data collection, analysis, and reporting.

(b) All materials and supplies necessary to implement and complete the Project shall be the exclusive property of the Member Agency. The District shall have

no ownership, right, title, security interest, or other interest in any Project facilities, materials, or supplies, nor in any rights, duties, or responsibilities for operation or maintenance thereof.

(c) The Member Agency shall comply with all applicable federal, state, and local requirements to implement and complete the Project.

(d) The Member Agency shall be solely responsible for the performance of its staff and/or representatives in complying with the terms of this Agreement, and for the proper allocation of funds received from the District for implementing and completing the Project.

(e) The Member Agency shall timely prepare and submit invoices and reports to the District as further described herein.

(f) The Member Agency shall timely pay its share of the costs of the Project.

6. Cost Estimate and Funding.

(a) The funds to be provided by the District to the Member Agency shall not exceed eighty-six thousand and 00/100 dollars (\$86,000.00).

(b) The costs for the Project to be paid by the District and by the Member Agency are set forth in attached Exhibit A. All costs greater than those shown in Exhibit A, which are necessary to implement and complete the Project pursuant to this Agreement, if any, shall be paid by the Member Agency. The Member Agency shall pay no less than twenty percent (20%) of the total cost of the Project.

7. Invoicing Requirements.

(a) The Member Agency shall invoice the District on a quarterly basis pursuant to the following schedule:

QUARTERLY BILLING PERIOD	INVOICE DUE DATE
January 1-March 31	April 20
April 1-June 30	July 20
July 1-September 30	October 20
October 1-December 31	January 20

(b) Invoices shall be sufficiently detailed to allow for review and approval by the District and each shall include the following: a cover letter indicating the billing period; a detailed breakdown of the costs submitted for reimbursement, including man hours and billing rates; documentation supporting the invoice, such as invoices for supplies, consulting services, etc.; and, an accounting of the amount(s) previously invoiced with respect to the total funding amount provided under this Agreement. The final invoice for the Project, or a component of the Project, shall provide information and documentation sufficient to demonstrate that it has been completed in accordance with the requirements and conditions of this Agreement.

8. Periodic Meetings. The District, at its discretion, may request periodically a meeting for review of the Member Agency's progress toward implementation and completion of the Project, including an initial meeting prior to commencement of the Project.

9. Reporting Requirements.

(a) Beginning with 2026, and for five (5) consecutive years following completion of the Project, the Member Agency shall provide to the District an annual calculation of per capita water uses within its retail service area. The calculation shall include an estimate of the population served and the volume of water delivered. This information shall be provided to the District by February 15 following the specific calendar year for which the report is made.

(b) If records are available, the Member Agency shall provide to the District, on or before July 1, 2027, the information requested in subparagraph 9 (a) for each calendar year between 2000 and 2026.

(c) Within forty-five (45) days following termination of this Agreement and prior to final payment, the Member Agency shall submit to the District a final, written report, including a summary of the Project; problems/challenges encountered; customer responses; Project benefits; a breakdown of final Project costs; and an evaluation regarding the effectiveness of the Project.

(d) If a retail customer of the Member Agency receives and installs a water-conserving device, fixture, or equipment as part of the Project, the Member Agency shall provide to the District the customer's water use information for three (3) full years prior to and following installation of the device, fixture, or equipment.

(e) The provisions of this paragraph 9 shall survive expiration or termination of the term of the Agreement.

10. Term. The term of this Agreement shall commence on the Effective Date, and it shall expire without further notice or condition on June 30, 2027, except all reporting obligations required by this Agreement shall survive its expiration or earlier termination for five (5) consecutive years.

11. Termination. Either party may terminate this Agreement upon sixty (60) days written notice to the other party.

12. Indemnification. The Member Agency shall indemnify, hold harmless, and defend the District, its Trustees, officers, employees, and agents against any claim or asserted liability arising out of the Member Agency's actions, either willful or negligent, or the actions of the Member Agency's officers, employees, or agents, in providing labor,

services, supplies, and materials pursuant to this Agreement, including any losses related to any claim made, whether or not court action is filed, and will include attorney fees and administrative and overhead costs related to, or arising out of, such claim or asserted liability.

13. Notices. All notices, requests, demands, and other communications required or allowed by this Agreement shall be in writing and shall be given by personal delivery or by certified mail, with return receipt requested, to the following addresses or to such other addresses as the parties may designate in writing:

If to District, to:

Jordan Valley Water Conservancy District
Attn: General Manager
8215 South 1300 West
West Jordan, Utah 84088

If to Member Agency, to:

City of South Jordan
Attn: Connor Oswald, Water Conservation Coordinator
1600 West Towne Center Drive
South Jordan, Utah 84095

Notice shall be effective on the date it is received by the other party.

14. Amendment. This Agreement may be amended only by written instrument signed by both parties.

15. Binding Nature. All of the grants, covenants, terms, provisions, and conditions in this Agreement shall be binding upon and inure to the benefit of the successors and permitted assigns of the parties.

16. Assignment. The Member Agency shall not assign this Agreement or any of its rights under this Agreement without the prior written consent of the District. The District may assign this Agreement and/or any of its rights under this Agreement.

17. Whole Agreement. This Agreement, including exhibits, constitutes the entire agreement of the parties and supersedes all prior understandings, representations, or agreements of the parties regarding the subject matter in this document.

18. Authorization. The Member Agency represents and warrants that it has authority to enter into this Agreement. In addition, each individual executing this Agreement does hereby represent and warrant that he or she has been duly authorized to sign this Agreement in the capacity and for the entities shown.

19. Miscellaneous. The parties shall perform those acts and/or sign all documents required by this Agreement, and which may be reasonably necessary to effectuate the terms of this Agreement.

Total JWCDC: \$86,000

Total South Jordan: \$21,500

Total of all Projects: \$107,500

JORDAN VALLEY WATER CONSERVANCY DISTRICT

**CONSIDER APPROVAL OF A WATER EFFICIENCY STANDARDS
AGREEMENT WITH THE CITY OF SOUTH JORDAN**

August 12, 2026

Account Number: Conservation Programs - 5670

Budgeted: Yes

Fund: O & M

Grant Amount (JVWCD'S Portion)	Funding Eligibility
\$86,000	\$86,000

Summary:

The City of South Jordan proposes to continue using various staff positions, including Planning Technician; Planner 1; Planner 2; Planner 3; City Planner; and Water Conservation Coordinator, for duties associated with the Water Efficiency Standards. It is anticipated that all of the duties will be directly associated with the Water Efficiency Standards. The specific duties for the position will include reviewing landscaping plans, working with builders for residential landscapes, inspecting completed landscapes, verifying code compliance with Water Efficiency Standards, documenting compliance, and coordinating commercial landscape projects.

Recommendation:

Approve award of \$86,000 to City of South Jordan Member Agency Water Efficiency Standards funding.

MEMBER AGENCY WATER EFFICIENCY STANDARDS FUNDING AGREEMENT

This Agreement is made and entered into as of July 1, 2026 (the “Effective Date”), by and between the Jordan Valley Water Conservancy District, a Utah special district (“District”), and the City of South Jordan, a Utah municipality (“Member Agency”).

RECITALS:

- A. The District desires to provide funding assistance to the Member Agency for additional costs relating to adopting the District’s Water Efficiency Standards (collectively, the “Standards”), as outlined in attached Exhibit A (the “Grant”);
- B. The Member Agency wishes to obtain funding assistance from the District and represents that it has met the eligibility requirements; and,
- C. The Member Agency has submitted to the District a proposal outlining the Grant request, and the District is willing to provide funding assistance, consistent with the terms of this Agreement.

TERMS:

The parties agree as follows:

- 1. Grant Description. A description of the Grant requested by the Member Agency is outlined in attached Exhibit A.
- 2. Grant Schedule. The Grant shall be fulfilled by the Member Agency in accordance with the schedule outlined in attached Exhibit A, notwithstanding any other provision or Exhibit of this Agreement to the contrary.

3. Grant Administration and Correspondence.

(a) The person designated to administer the Grant and to act as the chief contact for the Member Agency is:

Connor Oswald, Water Conservation Coordinator
City of South Jordan
1600 West Towne Center Drive
South Jordan, Utah 84095

(b) The person designated to represent the District in connection with this Agreement is:

Courtney Brown, Conservation Division Manager
Jordan Valley Water Conservancy District
8275 South 1300 West
West Jordan, Utah 84088

4. Eligibility for Grant. The Member Agency represents that it has:

(a) Adopted, by formal resolution, the District's Standards, as outlined in Appendix D of the Rules and Regulations for Wholesale Water Service ("Standards"); and,

(b) Demonstrated that the requested Grant is the result of adopting the Standards.

5. Member Agency Responsibilities and Ownership.

(a) The Member Agency and/or its representatives shall provide all labor, services, supplies, and materials to fulfill the Grant, including but not limited to administration, promotion, marketing, management, data collection, analysis, and reporting.

(b) All materials and supplies necessary to fulfill the Grant shall be the exclusive property of the Member Agency. The District shall have no ownership, right, title, security interest, or other interest in any Grant facilities, materials, or

supplies, nor any rights, duties, or responsibilities for operation or maintenance thereof.

(c) The Member Agency shall comply with all applicable federal, state, and local requirements to fulfill the Grant.

(d) The Member Agency shall be solely responsible for the performance of its staff and/or representatives in complying with the terms of this Agreement, and for the proper allocation of funds received from the District.

(e) The Member Agency shall prepare and submit invoices and reports to the District as further described herein.

6. Cost Estimate and Funding.

(a) The funds to be provided by the District to the Member Agency shall not exceed eighty-six thousand and 00/100 dollars (\$86,000.00).

(a) The costs for the Grant to be paid by the District are outlined in attached Exhibit A. All costs greater than those shown in Exhibit A, if any, shall be paid by the Member Agency.

7. Invoicing Requirements.

(a) The Member Agency shall invoice the District quarterly under the following schedule:

QUARTERLY BILLING PERIOD	INVOICE DUE DATE
January 1-March 31	April 20
April 1-June 30	July 20
July 1-September 30	October 20
October 1-December 31	January 20

(b) Invoices shall be sufficiently detailed to allow for review and approval by the District and each shall include the following: a cover letter indicating the billing period; a detailed breakdown of the costs submitted for reimbursement, including

man hours and billing rates; documentation supporting the invoice, such as invoices for supplies, consulting services, etc.; and, an accounting of the amount(s) previously invoiced concerning the total funding amount provided under this Agreement. The final invoice for the Grant, or a component of the Grant, shall provide information and documentation sufficient to demonstrate that it has been completed in accordance with the requirements and conditions of this Agreement.

8. Periodic Meetings. The District, at its discretion, may periodically request a meeting for review of the Member Agency's progress toward fulfillment of the Grant.

9. Reporting Requirements.

(a) Beginning with 2026, and for five (5) consecutive years following fulfillment of the Grant, the Member Agency shall provide to the District an annual calculation of per capita water uses within its retail service area. The calculation shall include an estimate of the population served and the volume of water delivered. This information shall be provided to the District by February 15 following the specific calendar year for which the report is made.

(b) If records are available, the Member Agency shall provide to the District, on or before July 1, 2027, the information requested in subparagraph 9(a) for each calendar year between 2000 and 2026.

(c) The provisions of this paragraph 9 shall survive the expiration or termination of the term of the Agreement.

10. Term. The term of this Agreement shall commence on the Effective Date, and it shall expire without further notice or condition on June 30, 2027, except all reporting obligations required by this Agreement shall survive its expiration or earlier termination for five (5) consecutive years.

11. Termination. Either party may terminate this Agreement upon sixty (60) days written notice to the other party.

12. Indemnification. The Member Agency shall indemnify, hold harmless, and defend the District, its Trustees, officers, employees, and agents against any claim or asserted liability arising out of the Member Agency's actions, either willful or negligent, or the actions of the Member Agency's officers, employees, or agents, in providing labor, services, supplies, and materials under this Agreement, including any losses related to any claim made, whether or not court action is filed, and will include attorney fees and administrative and overhead costs related to, or arising out of, such claim or asserted liability.

13. Notices. All notices, requests, demands, and other communications required or allowed by this Agreement shall be in writing and shall be given by personal delivery or by certified mail, with return receipt requested, to the following addresses or to such other addresses as the parties may designate in writing:

If to District, to:

Jordan Valley Water Conservancy District
Attn: General Manager
8215 South 1300 West
West Jordan, Utah 84088

If to Member Agency, to:

City of South Jordan
Attn: Connor Oswald, Water Conservation Coordinator
1600 West Towne Center Drive
South Jordan, Utah 84095

Notice shall be effective on the date it is received by the other party.

14. Amendment. This Agreement may be amended only by a written instrument signed by both parties.

15. Binding Nature. All the grants, covenants, terms, provisions, and conditions in this Agreement shall be binding upon and inure to the benefit of the successors and permitted assigns of the parties.

16. Assignment. The Member Agency shall not assign this Agreement or any of its rights under this Agreement without the prior written consent of the District. The District may assign this Agreement and/or any of its rights under this Agreement.

17. Whole Agreement. This Agreement, including exhibits, constitutes the entire agreement of the parties and supersedes all prior understandings, representations, or agreements of the parties regarding the subject matter in this document.

18. Authorization. The Member Agency represents and warrants that it has the authority to enter into this Agreement. In addition, each individual executing this Agreement does hereby represent and warrant that he or she has been duly authorized to sign this Agreement in the capacity and for the entities shown.

19. Miscellaneous. The parties shall perform those acts and/or sign all documents required by this Agreement and which may be reasonably necessary to effectuate the terms of this Agreement.

Grant Eligibility for Fiscal Year 2025/2026:

- Maximum Eligibility Amount: \$86,000 ($\$18,000 \times 2 + \$50,000$)
- Year 5 of 5 (last year of eligibility)

Grant Estimate:

- Estimated Grant Amount: \$86,000
 - o \$78,117 (total annual compensation)
 - o Annual Training: \$1,500 (includes multiple certifications)
 - o Equipment: \$38,000 (cost for a fully equipped vehicle, computers, tablets)
 - o Total Cost: \$117,617

Grant Schedule for Implementation:

- July 1, 2026 – Begin grant period, continue current job functions
- June 30, 2027 – End of grant period

ENGINEERING & WATER DEVELOPMENT ACTIVITIES

JORDAN VALLEY WATER CONSERVANCY DISTRICT

**CONSIDER APPROVAL OF GRANT OF EASEMENT TO SUMMITIG, LLC
AT 3582 WEST 10200 SOUTH, SOUTH JORDAN, UTAH**

August 12, 2026

Summary: Jordan Valley Water Conservancy District owns property located at 3582 West 10200 South in South Jordan, which has an existing reservoir and two booster pump stations on site. The property line for this property extends to the centerline of the 10200 South roadway. SummitIG LLC, a telecommunications company, is designing a project to install telecommunication conduit along 10200 South including six (6) HDPE conduits within an eight-inch (8") casing. SummitIG has proposed an acquisition of a five-foot (5') wide easement through JVWCD's property within the 10200 South roadway (being approximately 100' in length).

Property Owner	Grantee	Acquisition Type		Unit Cost	Easement Value (% of fee simple value)	Total Payment	Location
		Sqft	Type				
JVWCD	SummitIG, LLC	500	Easement	\$5.82/sqft	50%	\$1,500	3582 W 10200 S, South Jordan

Recommendation:

- 1. Approve the grant of easement to SummitIG, LLC; and,**
- 2. Authorize the General Manager and General Counsel to make necessary revisions; and**
- 3. Authorize the Board of Trustees' Chair to execute a grant of easement to SummitIG, LLC.**

WATER QUALITY & OPERATIONS ACTIVITIES

JORDAN VALLEY WATER CONSERVANCY DISTRICT

**CONSIDER EXPENDITURE APPROVAL FOR OUTSOURCED LABORATORY
SERVICES FOR FISCAL YEAR 2026/2027**

August 12, 2026

Project: Outsourced laboratory services for water quality analyses from
Chemtech-Ford Laboratories

Project Number: N/A

Budgeted: \$250,000

Fund: 2026/2027 O & M Budget

Analyses Category	Anticipated Costs
Pharmaceuticals	\$19,000
Geosmin	\$35,000
Inorganics & Metals	\$100,000
Pesticides & Radionuclides	\$16,000
Volatile Organics/PFAS/PFOA	\$20,000
Miscellaneous	\$60,000

Total Authorization Amount Requested: Not to exceed \$250,000 2026/2027 FY

Summary: JVWCD collects extensive samples throughout the water supply and delivery system to comply with state and federal regulations and to monitor water quality. Although JVWCD has its own environmental laboratory, it is not cost effective to maintain certification for all the required analyses. Therefore, JVWCD uses an outside laboratory for the analyses not completed in-house.

In 2024, JVWCD completed a competitive procurement process in which Chemtech Ford Laboratories was the low-cost proposer for these services. Chemtech-Ford has indicated that they are willing to continue to provide the contract services at the same cost as outlined for the previous fiscal year for fiscal year 2026/2027.

Recommendation: Authorize the expenditure, not to exceed \$250,000, to Chemtech Ford Laboratories for outsourced water quality analysis for FY 2026/2027.

REPORTING ITEMS

CAPITAL PROJECTS
JULY 2026

Final Project Completion Report

Project Name and Number: **SERWTP Influent Vault Rehabilitation, #4367**

Description: The valves in the Southeast Regional Water Treatment Plant influent vault stopped sealing properly. Thus, during plant shuts downs, significant water continued to flow into the plant. Additionally, the vault roof leaked water, endangering the electrical equipment inside the vault. This project replaced both the leaking valves and the vault roof. This project also replaced multiple valves and actuators in the SERWTP plant filter gallery that were aging and had reached the end of their useful life.

District Project Manager: Conor Tyson

Engineer: Condor Engineering (Structural Only)	Design Status: 100%
Original Engineering Contract Amount:	\$2,250
Final Engineering Contract Amount:	\$2,250

Contractor: Beck Construction and Excavation, Inc.	Construction Status: 100%
Original construction contract amount:	\$586,708
Total Change Order amount:	\$21,340
Final construction contract amount:	\$608,048
Total change orders as a percentage of original contract:	3.6%
Completion Schedule:	
Notice to Proceed:	5/15/2025
Final Completion:	6/17/2026

Summary of Change Orders:	
Description	Amount
1 Upgrade two actuators to modulating operation.	\$8,600
2 Install two flow meters, provided by JVWCD, during construction.	\$4,400
3 Provide a new vault hatch.	\$5,610
4 Remove old landscaping curb in project area.	\$2,730
Total Change Order Amount:	\$21,340

Final Project Completion Report

Removing old valves in filter gallery

Removing valves in influent vault

Newly poured vault influent vault roof

Influent vault with new roof and hatch

New landscape rock above completed influent vault to replace turf grass

New Valves and actuators in filter gallery

Final Project Completion Report

Project Name and Number: **JVWTP Chiller Replacement, #4331**

Description: The JVWTP chiller was installed in 2007 and reached the end of its serviceable life. It was experiencing more frequent repairs and replacement parts were difficult to obtain. The project included the supply and installation of a replacement chiller unit at the JVWTP high-rise building, with associated pumps, valves, and controls. It also included minor upgrades to JVWTP's lab ventilation controls.

District Project Manager: John Kahle

CAPITAL PROJECTS REPORT
June 11, 2026 - July 10, 2026

Project Name and Number: 2026 Distribution Pipeline Replacements - Millcreek Area Project, #4385

Project Description: JVVCD's retail distribution system in Millcreek and South Salt Lake includes numerous cast iron pipelines installed in the 1950's and 1960's that are in need of replacement due to age and deterioration. These pipelines are experiencing an increasing frequency of waterline breaks requiring ongoing repairs. This project will replace approximately 8,800 feet of cast iron pipe with new PVC pipeline and includes the installation of new fire hydrants, valves, meter setters and boxes, as well as roadway restoration in areas impacted by construction.

CAPITAL PROJECTS REPORT

June 11, 2026 - July 10, 2026

Project Name and Number: 3200 West 6200 South 8 MG Reservoir Asphalt Replacement, #4405

Project Description: The 8-MG reservoir located at 3200 West 6200 South is an above ground steel reservoir with an access/maintenance road around its edge. The existing asphalt has severe cracking, low points that cause water ponding, and a drain box that blocks vehicles from driving all the way around the reservoir. This project will replace the existing asphalt and road base with new material, regrade the road to provide proper drainage, and widen the road to allow vehicles to drive around the entire reservoir.

JORDAN VALLEY WATER CONSERVANCY DISTRICT
CAPITAL PROJECTS REPORT
June 11, 2026 - July 10, 2026

Project Name and Number: Utah Lake/Jordan River Treatability Study, #4372

Project Description: JVVCD's water portfolio includes more than 15,000 acre-feet of Utah Lake/Jordan River water that has not been utilized. The Jordan River contains elevated levels of organic materials and suspended solids that will require advanced treatment methods to meet drinking water standards. This study will (1) characterize water quality from several alternative source locations along the Jordan River, (2) evaluate potential treatment alternatives, and (3) estimate associated treatment costs. The findings will help shape long-term planning, water supply development, and budgeting efforts.

JORDAN VALLEY WATER CONSERVANCY DISTRICT
CAPITAL PROJECTS REPORT
June 11, 2026 - July 10, 2026

Project Name and Number: Wood Hollow Drainage Improvements, #4351

Project Description: Wood Hollow is a natural drainage that carries runoff from the hills above JVVTP to the Jordan River. In 2023, unusually high runoff caused significant erosion on JVVTP property and exposed the top of the Southwest Aqueduct, underscoring the vulnerability of both the Jordan and Southwest Aqueducts. This project will address this risk by installing a culvert over the aqueducts, preventing erosion and protecting them from future high-runoff events.

District Project Manager: John Kahle

JORDAN VALLEY WATER CONSERVANCY DISTRICT
CAPITAL PROJECTS REPORT
June 11, 2026 - July 10, 2026

Project Name and Number: JWVTP Backwash Outlet Valve Replacement Project, #4349

Project Description: JWVTP utilizes gravity filters to remove particulates from the water it treats. These filters require periodic backwashing to maintain their effectiveness. The backwash water goes to a reclamation basin where the particles are allowed to settle out and the water is then reintroduced into the treatment process by two outlet valves. The backwash valves were installed in 1986, have reached the end of their useful life and no longer seal properly. This project will replace two 36-inch butterfly valves with new double offset butterfly valves. This work will also include adding two power receptacles near the outlet structure to facilitate dewatering of the outlet structure with a portable sump pump.

JORDAN VALLEY WATER CONSERVANCY DISTRICT
CAPITAL PROJECTS REPORT
June 11, 2026 - July 10, 2026

Project Name and Number: Jordan Aqueduct Spot Repairs, #4402

Project Description: In 2020, a steel cylinder wall loss survey was conducted on the Jordan Aqueduct Reach 1 using high-resolution electromagnetic flux equipment capable of detecting corrosion in areas as small as 1/2 inch by 1/2 inch. The survey identified 15 locations along the pipeline requiring further evaluation and repair. The project will include exposing the identified areas, reassessing the extent of the corrosion, and performing necessary repairs. These efforts are critical to maintaining the structural and long-term reliability of the aqueduct.

Current Status: The meters for the project have been delivered to the contractor's warehouse. The butterfly valves for the project are still on track for delivery in October. The valve and meter replacement is scheduled to be performed in winter 2026, when materials arrive on site and the Jordan Aqueduct is taken offline.

JORDAN VALLEY WATER CONSERVANCY DISTRICT
CAPITAL PROJECTS REPORT
June 11, 2026 - July 10, 2026

Project Name and Number: Casto Springs Water Treatment Plant, #4336

Project Description: JVVCD holds water rights for two springs in Holladay Utah: Casto Spring and Dry Creek Spring. Following an evaluation, the springs were determined to be under the influence of surface water and therefore require treatment before they can be used as drinking water. JVVCD was awarded a \$3 million WaterSmart Grant from the Bureau of Reclamation (BOR) in 2025 to construct a treatment plant for these springs. The Bureau of Reclamation will reimburse 30% of total project costs including predesign, design, and construction management. This project will enable JVVCD to enhance system capacity, improve water resource utilization, and strengthen long-term supply resilience.

CAPITAL PROJECTS REPORT
June 11, 2026 - July 10, 2026

Project Name and Number: 2026 Multi-Site Landscaping, #4395

Project Description: JVVCD has an initiative to replace all existing landscapes comprised primarily of turf grass at various well, reservoir, and pump sites with waterwise landscaping over the next 10 years. This project will include turf grass removal within park strips and the frontage areas of four well sites. The new landscapes will save water and maintenance time and will also be a demonstration of water-wise landscaping the surrounding communities. The JVVCD Conservation Staff designed the new landscaping which includes water-wise plants, rock mulch, drip irrigation, and preservation of existing trees at the sites.

JORDAN VALLEY WATER CONSERVANCY DISTRICT
CAPITAL PROJECTS REPORT
June 11, 2026 - July 10, 2026

Project Name and Number: SERWTP Concentration-Time Improvements, #4393

Project Description: The Southeast Regional Water Treatment Plant (SERWTP) has trouble providing enough concentration-time (CT) to provide adequate disinfection as required by Utah drinking water regulations. CT is the amount of time needed for chlorine to be in contact with the water to ensure safe drinking water. To overcome this issue, operators start dosing chlorine earlier than desired which causes disinfection byproducts (DBPs) and provide a higher chlorine dose which increases customer complaints. This project aims to resolve this issue by evaluating options to increase the detention time for water leaving the treatment process. This will improve CT, lower the chlorine dose, and decrease DBPs.

CAPITAL PROJECTS REPORT

June 11, 2026 - July 10, 2026

Project Name and Number: SERWTP Digital Twin, #4375

Project Description: The SERWTP treats water from two sources, Deer Creek Reservoir and local mountain streams. The local mountain stream water quality is constantly fluctuating which makes treatment difficult. Every year, the SERWTP turns away approximately 600 acre-feet of mountain stream water due to an inability to quickly react to the variable water quality. This project aims to create a “Digital Twin” pilot of the treatment plant. This pilot will use real-time data to simulate the treatment process to provide treatment recommendations to the plant operators and opportunities to run various scenarios. This tool will enable the operators to utilize more of the mountain stream water and optimize their chemical dosing making the plant more efficient and cost effective.

Project Description: Consulting services to perform a feasibility study of wastewater reuse. The District is heading up a stakeholder group consisting of local municipalities, sewer, and water districts to identify potential reuse projects.

District Project Manager: Shane Swensen

Engineer: Bowen Collins & Associates	Original engineering contract amount:	\$27,796
	Design Status: 95%	
<u>Additional services authorized since last report:</u>		
• n/a		
Current contract amount:		\$27,796

<u>Other Approvals since last report</u>	<u>Vendor</u>	<u>Amount</u>
• n/a		

Current Status: Draper Irrigation Company and Bluffdale City will be the only two entities that will use the recycled wastewater with the initial phase of the project. The facilities will be designed to accommodate future expansion if other entities later decide to participate in the project. The State Engineer has approved the water reuse application and Central Utah has approved grant funds for this project Draper Irrigation Company is planning on moving forward with the design.

REPORT ON UTAH'S STATEWIDE WATER ASSESSMENT

BRIEFING NOTE

Colorado River Post-2026 Operations: Final Environmental Impact Statement

Released by the Bureau of Reclamation, July 31, 2026 — summary and state-by-state impacts

What Was Published

On July 31, 2026, the Bureau of Reclamation released the Final Environmental Impact Statement for Post-2026 Operational Guidelines and Strategies for Lake Powell and Lake Mead. It is the replacement for the 2007 Interim Guidelines, which expire at the end of 2026, with new operations required to begin October 1, 2026.

A Notice of Availability was published in the Federal Register the same day. Unlike the January 2026 draft, which deliberately declined to name a preferred path in order to give the states more negotiating room, the Final EIS designates a preferred alternative. Reclamation received more than 18,000 comments on the draft, including 785 unique submissions from the public, tribes, states and federal agencies.

The Core Design: An Adaptive Framework

Rather than fixing a decade of cuts up front, the preferred alternative establishes an adaptive decision framework running ten years through 2036. Within it, the Department would issue operating guidelines at anticipated two-year intervals, unless a consensus-based agreement among the states justifies a longer duration. If the seven states do reach a deal, it can be folded into future operations.

The framework sets “sideboards” — outer limits within which each set of two-year guidelines must fall:

- **Lake Powell annual releases:** between 5.0 and 12.0 million acre-feet (maf).
- **Lower Basin shortages:** up to 3.0 maf.
- **Conserved-water storage:** up to 8.0 maf in Lake Mead and up to 3.0 maf in Lake Powell.
- **Upper Basin conservation:** voluntary, up to 200,000 acre-feet (kaf) per year, subject to hydrology.

Why Now: The Hydrologic Picture

Combined storage in Lake Powell and Lake Mead has not been this low since before Glen Canyon Dam began filling in 1963. Unregulated inflow into Lake Powell was estimated at only 3.5 maf as of July 2026, against a 2000–2024 average of 12.9 maf — and against the roughly 18 maf assumed when the 1922 Compact apportioned 7.5 maf to each basin.

Average consumptive use in the basin from 2020 to 2024 ran about 13.1 maf per year: 6.5 maf in the Lower Basin (49%), 3.8 maf in the Upper Basin (29%), 1.4 maf to Mexico (11%), and 1.4 maf lost to evaporation (11%). Since 2000, use has exceeded total system inflow in most years.

State-by-State Impacts

Reclamation modeled a “Representative Preferred Alternative” to illustrate how shortages could be distributed. These are modeling assumptions, not binding allocations — actual numbers arrive with each two-year set of guidelines.

Lower Basin — Mandatory Cuts

For 2027 and 2028, shortages up to 1.5 maf would follow the Lower Division States’ May 1, 2026 proposal; anything deeper falls under the priority system. From 2029 onward, all shortages follow priority unless new agreements are reached. Priority is decisive: junior rights created after 1968 — including much of the Central Arizona Project serving Phoenix and Tucson — must be reduced before California’s senior rights are touched.

State	2027–28: first 300 kaf	2027–28: up to 1.5 maf	2029–2060: first 1.814 maf
Arizona	80%	43.33%	77.40%
California	0%	36.67%	0% (51.63% above)
Nevada	—	3.33%	5.93%

Worked example. At a Lower Basin shortage of 1.5 maf in 2027 or 2028, the modeled split is Arizona 760 kaf, California 440 kaf, Nevada 50 kaf, with Mexico’s modeled share at 250 kaf.

- **Arizona** — hit hardest at every tier. For deeper shortages between 1.5 and 2.344 maf, its share climbs to 76.26%. Low-priority CAP supply is the reason it stands first in line.
- **California** — largely shielded at shallower shortage levels by senior rights, but exposed in the deepest tiers: above 2.345 maf its share jumps to 45.16%, and 51.63% of everything above 1.814 maf from 2029 on.
- **Nevada** — smallest share because its overall allotment is small, rising to 7.08% for deeper cuts in 2027–28. Nearly all of its supply is municipal, delivered through the Southern Nevada Water Authority.

Upper Basin — No Mandatory Cuts

Colorado, Utah, Wyoming and New Mexico face no mandatory Lower Basin shortage reductions. Instead, the plan sets a voluntary conservation target of up to 200 kaf per year, stored in a Lake Powell pool that can reach 3.0 maf and shared with Upper Basin tribes — roughly 5% of the Upper Basin’s annual use. In practice this could mean paying farmers or irrigation districts to fallow fields or improve irrigation efficiency.

Shares of Upper Basin water under the 1948 Upper Colorado River Basin Compact: Colorado 51.75%, Utah 23%, Wyoming 14%, New Mexico 11.25%.

The real Upper Basin exposure is not a mandated cut but the release regime. The framework contemplates lower Lake Powell releases as hydrology deteriorates, which affects storage, hydropower and recreation upstream. Utah draws roughly 27% of its total water supply from the Colorado River.

Reactions

- **Arizona** — Gov. Katie Hobbs called the range of options unacceptable for forcing Arizona to take the majority of cutbacks, while urging adoption of the Lower Basin’s own 2027–28 compromise proposal.
- **Nevada** — Gov. Joe Lombardo warned of potentially devastating economic and environmental impacts. SNWA general manager John Entsminger argued that Nevada receives 1.8% of the river’s water yet faces reductions of hundreds of thousands of acre-feet.
- **California** — Colorado River Board chair JB Hamby framed the underlying problem as one requiring measurable reductions from every state, noting California’s use has fallen to its lowest level since 1949.
- **Upper Basin** — Govs. Polis (CO), Cox (UT), Gordon (WY) and Lujan Grisham (NM) issued a joint statement saying they were encouraged that new guidelines would better reflect actual water supply, while noting details were still under review.

What Comes Next

- Release of the 2027–2028 operating plan, the immediate next step and the document that turns the framework into concrete numbers.
- A Record of Decision, followed by new operations beginning October 1, 2026.
- A separate binational process on deliveries to Mexico, handled through the International Boundary and Water Commission under the 1944 Water Treaty. The Final EIS covers domestic operations only.
- Continued state negotiations — the framework preserves a path for a consensus agreement to be incorporated. Litigation from Lower Basin states over the mandatory-versus-voluntary asymmetry remains a live possibility.

REPORT ON MEDIA COVERAGE

August 12, 2026

This report includes mass media articles that are directly related to JVVCD's mission, projects, initiatives, and programs and are published during the defined reporting period.

Reporting Period: July 1, 2026 – July 31, 2026

1. **Neutral** - Ortiz, A. (July 6, 2026) *Church of Jesus Christ leaders call on Utah members to conserve water amid statewide drought.* Deseret News.
<https://www.deseret.com/faith/2026/07/06/church-of-jesus-christ-leaders-ask-utah-members-to-conserve-water/>

News article covering a letter from the Utah Area Presidency of The Church of Jesus Christ of Latter-day Saints encouraging members to conserve water during Utah's statewide drought. The article highlights the Church's ongoing water conservation efforts, including waterwise landscaping, smart irrigation systems, and water rights donations. Jordan Valley Water Conservancy District is mentioned as a partner in a collaborative effort to lease and release 10,000 acre-feet of water from Utah Lake to the Great Salt Lake.

2. **Positive** - Nielsen, A. (July 22, 2026) *Conservation Garden Park welcomes the wet weather at Spring Garden Fair.* West Jordan City Journal.
<https://www.westjordanjournal.com/2026/07/22/578131/conservation-garden-park-welcomes-the-wet-weather-at-spring-garden-fair>

Feature article highlighting Conservation Garden Park's 2026 Spring Garden Fair. Kelly Good (JVVCD staff) is quoted discussing the Garden's role in demonstrating that waterwise landscapes can be attractive, functional, and family-friendly while helping residents reduce outdoor water use. Madeline Suelz (JVVCD staff) is also quoted about the value of community partnerships and the Garden's commitment to providing free educational events and resources to the public.

MEDIA COVERAGE

The best defense against Utah's extreme heat might be a tree

The Washington County Water Conservancy District is offering a “treebate” to incentivize southwest Utahns to plant trees.

By **BROOKE LARSEN**

The Salt Lake Tribune

The air in St. George reached a toasty 104 degrees on a Wednesday afternoon in June.

“The wind feels like it’s coming from the Sahara Desert,” said Bonnie Pendleton. But under the shade of two mulberry trees outside the West Village Neighborhood Cafe, she added, the heat felt bearable.

Known as “the plant lady,” Pendleton is a member of the St. George Shade Tree and Beautification Board and a gardening consultant.

Without the old trees that line the sidewalks of much of downtown St. George, where temperatures often break 100 degrees from June to September, the community would roast, Pendleton said. “Our air conditioning units would quit working if we didn’t have shade over some parts of our

TRENT NELSON | *The Salt Lake Tribune*

Palm trees provide shade last week in downtown St. George.

homes,” she added.

As Utah grapples with extreme heat and scarce water this year, trees may help make cities cooler and more drought tolerant.

Trees are the most effective tool to reduce the urban heat island effect, said Doug Bennett, the conservation manager for the Washington County Water Conservancy District. Trees also need less water than lawns, Bennett said, so with

the right irrigation set up, they can more easily survive Utah’s scorching, dry summers.

To encourage more people to plant trees, the district recently added a “treebate” to its water efficient landscape program that incentivizes residents to replace their lawns with drought-tolerant plants. Now participants will receive an additional \$100 for each

Please see **TREES, A5**

Trees

Continued from A1

qualifying tree planted with proper drip irrigation.

Every time the district promotes its landscape conversion program, someone complains about urban heat, said Karry Rathje, the district's public affairs manager. But it's a common misconception that lawns mitigate hot city temperatures.

"Lawn is fairly neutral to urban heat island effect: it doesn't create it, but it also can't stop it," Bennett said. Trees can intercept ten times more of the sun's hot energy than lawns, he explained in a video the district made on the urban heat island effect.

"The benefit of a tree is going to extend to the community at large," Bennett said. "Not that we all don't like looking at a flower, beautiful shrub or ground cover, but trees, in my opinion, are really what make the neighborhood really attractive and give it a sense of place."

St. George trees

When looking over downtown St. George from the red cliffs on the north edge of the city, an expanse of tall, green trees tower above the historic homes, casting shade on the sidewalk and streets.

One of the first things Mormon pioneers did when they settled the St. George area was plant trees, Pendleton said. "They had gotten saplings like elm and mulberry and cottonwoods along the way, and planted them as soon as they got here, because they were exposed to the elements. ... Even some of the trees that were planted 100 years ago are still here," she said.

They also planted food trees, including pecans, apples and pomegranates, the fruit of those still making up the "Dixie salad" that some families prepare on Thanksgiving, Pendleton said.

The city's shade tree board aims to preserve the city's tree canopy. To remove a healthy tree within 10 feet of a right-of-way during construction activities, a developer must first get approval from the board, according to the city's zoning regulation. Trees must also be protected and watered during construction activities.

Any development in St. George must have one "water-conserving" tree for every 4,000 square feet of landscaping and a minimum of one tree per property, according to city code. For residential areas, each single-family dwelling must have at least two drought-friendly trees, including at least one planted in the front yard.

"We need to keep the canopy to stop the heat island effect," Pendleton said. "Our downtown is a great example of keeping our

TRENT NELSON | The Salt Lake Tribune

Homes shaded by trees in St. George last week.

canopy, because there's a lot of places that you can walk in the old downtown St. George, and you are staying underneath the canopy of trees."

Planting trees for the desert

The water district has a list of its top ten "shady characters" that are most likely to succeed in southwest Utah's desert environment. That includes the wide-spreading Arizona velvet mesquite, the desert willow with orchid-like blooms and the silvery-green fruitless olive tree.

The Chinese pistache is one of Bennett's favorite shade trees. "It endures heat, it endures cold," he said. "I've seen it thrive and grow in places where the shopping center was abandoned and the trees didn't die. I've seen it growing in really difficult situations."

There are also some trees the district doesn't recommend planting due to disease or heat intolerance. Ash trees are on the top of that list.

"Ash trees have long been the shade tree of choice, but we have a disease called ash yellows that has moved into the region," Bennett said. "We have ash borers that attack them, so whenever they become stressed, the disease and insect issues will often take them out."

Ash trees currently make up about 15 to 20% of Utah's urban canopy. To try to protect those trees, the state has banned the importation of new ash trees, according to the Utah Department of Agriculture and Food.

Purple plum is another popular tree that doesn't qualify for the district's treebate. "We're finding that the longevity of a purple plum is getting shorter and shorter as

our communities become hotter and hotter," Bennett said.

Bennett and Pendleton also said it's important to choose the right location to plant — both for the tree and optimal shade.

Planting in the middle of a paved parking lot is "cruel and unusual punishment" for a tree, Bennett said. While some trees can survive in a small hole surrounded by compacted ground, most won't grow well in that kind of environment. Rather, trees need space to expand their roots, he said.

In a shopping center, that may look like creating a large strip of landscaping designed to capture rainwater. In a yard, it's ideal to plant 20 to 30 feet away from a house or other structures, as the tree's roots will spread.

To reap the most benefit from the tree's shade during the hot afternoon, Pendleton also recommends planting on the south and west sides of a building.

Trees in southwest Utah need water year round, Pendleton said, particularly in dry, warm winters like the state just experienced. Infrequent but deep watering is best, and the irrigation system also needs to expand as the tree grows to ensure the water reaches the extensive root system.

"It's not uncommon to go out and see a tree that's eight or 10 inches in trunk diameter, and then they have these little emitters right at the base. ... That would be like if you told me you were thirsty and I poured a glass of water over your head," Bennett said. "The water was there, but not in a place that you could use it."

To find more tips on tree care, Bennett recommends reaching out to the Cooperative Extension System, housed at Utah State University in Utah, or the Arbor Day Foundation.

WATER CRISIS

Lawn gone: Washington County water managers boost cash incentive for residents to ditch grass

Desert-friendly yards are gaining ground in drought-parched area.

By MARK EDDINGTON
The Southern Utah Tribune

Trading turf for desert landscaping just got a bit more lucrative. Water managers in Washington County are bumping their grass-removal rebate to push hesitant homeowners off the fence and into water-wise landscaping.

After several years of paying \$2 per square foot to help residents rip out thirsty grass, the Washington County Water Conservancy District has increased the incentive to \$3 per square foot on the first 1,000 square feet of lawn removed. That covers most residential yards.

"We'd been at \$2 for three seasons," said Doug Bennett, the district's water conservation manager. "My research suggests that costs have gone up between 15 and 25%. Our rebate was actually seeming to shrink, so we wanted to make sure we gave a boost during drought conditions and encourage people to finish projects swiftly rather than sit on them."

The extra dollar not only aims to save water, Bennett added, but also to buck the trend of local landscaping businesses experiencing their slowest season during St. George's hot summers.

"It's a good opportunity to give a boost to the local economy... at a time when it is most critical for us to conserve water," he said. "The \$3 rebate should give people on the fence a bit of a push to move in the right direction."

'Do this now'

Since the launch of the program in December 2022, Washington County residents have completed nearly 3,000 projects and removed nearly 4 million square feet of grass, according to district officials.

"You could push a lawn mower from here to Santa Barbara, California, across the amount of grass that the citizens of Washington County have replaced with desert-appropriate plants," Bennett said.

The district expects the enhanced rebate to cost about \$500,000 more than the previous program — though half will eventually be reimbursed by the state as part of the Water

CHRIS GREEN | Contributed

Residents of Sun Country Meadows South — a 55-plus community in St. George — have converted more than 20,500 square feet of grass adjacent to their homes into more drought-tolerant landscaping. For residents considering doing the same, the Washington County Water Conservancy District has increased the incentive to \$3 per square foot on the first 1,000 square feet of lawn removed.

Efficient Landscape Program.

"We have to budget for the full cost of the program, and then we get reimbursed by the state," Bennett said. "In terms of actual expense, we're looking at about \$250,000."

The higher payout comes with a deadline. The district's board has only authorized the extra dollar for projects completed by June 1 of next year. After that, unless the board takes new action, the rebate snaps back to \$2. "So we're encouraging people to do this now," Bennett said.

This grass-reduction initiative is saving roughly 500 acre-feet — nearly 200 million gallons — of water annually, he said. Early data shows participating homeowners are cutting their usage by 80,000 to 100,000 gallons per year, in some cases slashing their previous water demand by nearly half.

Change of heart

When turf removal was first introduced, residents of Sun Country Meadows South — a 55-plus community in St. George — met the proposal with deep skepticism, according to

resident Chris Green.

"Many residents simply could not picture a beautiful community without traditional grass," said Green, who serves on the landscaping committee for the 17-acre property of 119 townhouses.

Now, she added, attitudes have changed. Residents have converted more than 20,500 square feet of grass adjacent to their homes into more drought-tolerant landscaping. In addition, the homeowners association has transformed 17,500 square feet of turf, previously unusable because it was in decorative patches around the clubhouse and pond.

"In its place, we now have beautiful walking paths and seating areas where everyone can now enjoy the pond and local wildlife," Green said.

'Treebates' for shade trees

For Zach Renstrom, the district's general manager, conservation is smart economics.

"When we conserve an acre-foot of water, it's the cheapest water we can get," he said.

"We are not giving up anything. We are actually replacing it with something that's very beautiful, very green, and makes our community a better place."

Renstrom calls the program "a continuation" of Washington County's long-running effort to stretch a limited resource. "We've always looked at how to be good stewards of our water," he said.

Alongside the fatter turf rebate, the district is paying people to plant shade trees to fight urban heat islands. Participants in the budding "Treebate Program" can now get \$100 per tree, with one tree allowed for every 700 square feet of project area. Approved species include desert-adapted or low to moderate-water trees such as desert willow, oaks and Mondale pine that can reach at least 15 feet tall.

On an extremely hot summer day, sitting beneath the shade of a tree makes a huge difference.

"When you have shade," Bennett said, "those surfaces underneath [trees] can be 50 degrees Fahrenheit cooler than they would be if they were exposed to the sun."

Popular northern Utah reservoir to be drained amid dire conditions

Drought and low water levels, say Ogden officials, are an ideal time to tackle pipeline replacement project.

By LEIA LARSEN

The Salt Lake Tribune

Note to readers » *This story is made possible through a partnership between The Salt Lake Tribune and Grist, a nonprofit environmental media organization.*

■ ■ ■

Boaters and paddleboarders at the popular Pineview Reservoir may soon be calling the lake “mudview” as it gets drained to facilitate replacement of an aging pipeline.

Ogden City officials are working to upgrade a 55-year-old waterline that runs beneath the reservoir to the city’s wells in Ogden Valley, as well as a 100-year-old pipe running through Ogden Canyon. But the reservoir will need to drop by 50 feet to complete the work, which has water managers nervous following Utah’s driest winter on record.

“It’s stressing us out,” said Scott Paxman, general manager for the Weber Basin Water Conservancy District, which operates the Pineview Dam.

The reservoir typically has about 40,000 acre-feet leftover when summer and irrigation seasons wrap. With the required draw-down to support Ogden City, however, Paxman said he expects there will be about 2,000 acre-feet of water left by Oct. 1, or about enough water to support the basic needs of 4,000 households. That’s the lowest Pineview will have dropped since the 1970s, Paxman said.

“Their perspective is it’s going to be low anyway,

might as well do it,” Paxman said, referring to the city. “Well yes, but that might be the only water we have left next year.”

Weber Basin typically has enough water storage to meet the needs of Weber County and parts of Box Elder County for two years’ worth of drought. Paxman said they will try to keep water otherwise stored in Pineview in Echo Reservoir, which lies higher in the watershed, or in Willard Bay, a reservoir downstream and next to the Great Salt Lake.

The water district began upping its releases around a month ago to meet Ogden City’s needs. It is losing about 500 acre-feet a day, Paxman said, or 2% of its capacity. Pineview currently sits at about 4,885 feet above sea level, and plans call to drain it to 4,835 feet.

“Replacing it now protects long-term water reliability, preserves the integrity of a vital public asset, and takes advantage of a rare opportunity created by naturally low reservoir levels,” Justin Anderson, the city’s executive director of Public Services, said in a news release.

Ogden City officials say the old pipeline currently leaks about 1 million gallons of drinking water each day. Total cost for the project is around \$100 million, which the city will pay for with federal loans from the Environmental Protection Agency, the Drinking Water State Revolving Fund and other state and federal grants. Weber Basin warned that the city’s work needs to be completed no later than Jan. 15, Paxman said.

The water pipeline serves around 120,000 people in the Ogden area, according to city information. The city will replace 6.4 miles of pipeline at completion.

When the reservoir will refill depends on next

winter’s snow conditions, the city notes.

Draining the reservoir to meet Ogden City’s needs comes at the frustration of some boaters.

“Ogden City doesn’t give a crap about how much it will affect us,” said Ryan Bosley, commodore of the Ogden Pineview Yacht Club. “We’re in scramble mode.”

Bosley worries the draw-down will leave the club’s wave breaks and boat slips stranded in the mud, potentially causing hundreds of thousands of dollars’ worth of damage, if not millions. He said his members are working with out-of-state vendors to minimize impacts.

“We still don’t know how well it’s going to work,” Bosley said.

The club will start pulling boats from its marina in three weeks so managers can begin grappling with the docks.

“The biggest fear for us, if we don’t get a really good winter,” Bosley said, “we’ll be back [stuck] in the ground next year. I’m amazed Ogden City is taking that risk.”

Biologists with the Utah Division of Wildlife Resources expect minimal impacts to fish living in the reservoir. But they plan to double the amount of fish anglers can harvest sometime in early July to mitigate any potential impacts.

“Water will recede slow enough for fish to find deeper water,” a division spokesperson said.

The state stocks tiger muskellunge, which are sterile, each year to maintain populations. The division expects all other fish species populations to rebound naturally in the reservoir.

More information on the Ogden City water pipeline replacement project is available at ogdencitypipeline.com.

TRENT NELSON | *The Salt Lake Tribune*

The Green River flows through Red Canyon and Flaming Gorge in 2023.

How much water does Flaming Gorge actually lose to evaporation? Water managers may finally find out.

By **BROOKE LARSEN**

The Salt Lake Tribune

As hot temperatures sweep across Utah and water supplies continue to drop, states and the federal government are launching a new effort to better measure how much water evaporates from major reservoirs upstream of Lake Powell.

The Bureau of Reclamation partnered with scientists and Upper Basin states, including Utah, Colorado, New Mexico and Wyoming, to launch a new evaporation study at Flaming Gorge, Blue

Mesa and Navajo reservoirs — key water storage projects in the Upper Colorado River Basin.

“We’re deploying some state-of-the-art instrumentation to monitor evaporation and weather conditions over the reservoirs,” said Chris Pearson, a research scientist at the Desert Research Institute who was busy installing equipment on floating platforms at Navajo Reservoir, which straddles the Colorado and New Mexico border, last week.

Platforms were launched at Flaming Gorge, which spans Utah and Wyoming, in April and

Colorado’s Blue Mesa reservoir in May.

The project was funded through a \$50 million grant from the Infrastructure Investment and Jobs Act, which was passed during the Biden administration. The funding is meant to improve reporting, measuring and monitoring of water use in the Upper Basin states, Chuck Cullom, director of the Upper Colorado River Commission, told *The Tribune*.

“Reservoir evaporation is about 15% of the Upper Basin depletions every year, and so if we can

Please see **EVAPORATION, A4**

Evaporation

» Continued from A1

improve our understanding of evaporation losses, it'll help water managers in a year like this make the best decisions on when and how much water to release and how to operate those reservoirs," Cullom said.

The Colorado River Basin received its worst snowpack and some of its warmest winter and spring temperatures on record this year. Reclamation is sending up to 1 million acre-feet of water from Flaming Gorge to prop up Lake Powell, which forecast models show will reach levels that threaten hydropower production and could damage dam infrastructure by early next year.

This new evaporation study is a "piece of a big puzzle" states are trying to solve, said Gene Shawcroft, Utah's Colorado River commissioner. "We are trying to make sure we understand as much as we can about every drop of water and where it goes and how it's used."

Evaporation counts against each state's water allocation and consumptive use, Shawcroft added.

How the study will help

Reclamation and the states have modeled the new study in part after the long-term evaporation monitoring program at Lake Powell. The agency and states hope it will provide more data to improve future decision-making.

"This study helps strengthen

the technical foundation needed for future reservoir operations, forecasting and accounting efforts," said Wayne Pullan, Reclamation's regional director for the Upper Colorado Basin, in a statement on Thursday.

Historically, most evaporation studies in the Upper Basin were done with equipment that was on land next to a reservoir. By installing instruments in the middle of the reservoir, researchers can better understand what's happening across the water body, Pearson said.

The new instruments will capture real-time data on air temperature, relative humidity, wind speed, water temperature

at different elevations and more to give a full picture of evaporation and the factors that affect it. "It's basically a super weather station," Cullom said.

So far, the new evaporation monitoring technology appears to be improving the accuracy of data collected, Cullom said.

"That's really important this year because the storage in those reservoirs is changing dramatically at Flaming Gorge and Blue Mesa," Cullom continued, "and having these instruments actually on the water surface is telling us how evaporation changes when the amount of water in those reservoirs changes."

Data is showing that the temperature of the lake changes more rapidly than they thought when there is less water in the reservoir, Cullom explained. "It's like a giant refrigerator when it's full, and then it's more like an igloo cooler."

With more accurate data, water managers will be able to operate reservoirs more precisely, Cullom said. "That's increasingly important as our water supplies are getting tighter every year," he added.

Colorado River's two biggest reservoirs hit a new record low

Total water stored in Lake Powell and Lake Mead drops to levels last seen before Lake Powell even existed.

By **BROOKE LARSEN**

The Salt Lake Tribune

Lake Powell and Lake Mead hit a grim milestone this week.

The combined storage in the nation's two largest reservoirs has dropped to a level not seen since 1956, when Glen Canyon Dam was still under construction, according to a new paper from Jack Schmidt, Anne Castle and other Colorado River scholars.

"It is humbling and potentially disturbing to think about the fact that ... we haven't had that little water in the bank account since

before Lake Powell even existed," said Schmidt, the director of the Center for Colorado River Studies at Utah State University.

The two reservoirs hold almost 60% of the water stored in the Colorado River system. As of July 12, Mead was 27% full and Powell was 24% full, according to the Bureau of Reclamation.

"Powell is downstream of all of the significant Upper Basin uses and Mead is upstream of all the significant Lower Basin uses," Schmidt said, "so essentially it's one gigantic reservoir divided into two parts by the length of Grand

Canyon National Park."

The Upper Basin includes Utah, Colorado, New Mexico and Wyoming; the Lower Basin consists of Arizona, California and Nevada.

The record low levels may open up questions about which reservoirs are needed, Schmidt said. However, he added he doubts current water managers, who currently can't reach consensus about how to share the river, are ready for those conversations.

"The big questions that are implied by where we're at are ones that absolutely need to be addressed, but they're not going to be addressed now," he said. "I mean, we can't even have functional conversations about how to reduce consumptive use."

The seven states that share the Colorado River still can't agree on how to manage the river system after current guidelines expire at the end of this year.

But states met yesterday and more meetings are anticipated next week, Gene Shawcroft, Utah's Colorado River negotiator, told The Tribune. The two basins have agreed to exchange previously unshared draft agreements that they have been separately working on with the federal government, Shawcroft added.

Reclamation must have operating plans before the water year starts at Lake Powell on Oct. 1. The agency is expected to release a final environmental impact statement this month.

How Powell levels affect storage at other reservoirs

After a record dry and warm winter, Reclamation has been reducing flows out of Glen Canyon Dam and increasing releases out of Flaming Gorge to keep water at Lake Powell above what the agency has called "critical elevation levels."

Below 3,500 feet, the agency has documented damage to the infrastructure at the dam. Below 3,490 feet, the dam can no longer generate hydropower and Reclamation must send water through lower outlets that weren't "intended to be operated" for long-term use, Katrina Grantz, Reclamation's deputy director for the Upper Colorado Region, told The Tribune in June.

"We're effectively sacrificing Lake Mead and Flaming Gorge to prop up Lake Powell Reservoir," said Eric Balken, executive director of Glen Canyon Institute.

"We're just getting to a point with Powell and Mead where we have these two mega reservoirs that are going to be both 80% empty soon," he added, "and I think a lot of people are scratching their heads and they're saying, at what point should we consider saving one of them?"

Balken told The Tribune it's time for decision makers to "start thinking outside of the box," including reengineering infrastructure at Glen Canyon Dam.

The Tribune asked Grantz about Glen Canyon Institute's proposal to "Fill Mead First" in June, and she said she "can't

FRANCISCO KJOLSETH | The Salt Lake Tribune

Eric Balken, Glen Canyon Institute executive director, talks on April 25 about the changes he has seen in a canyon that has surfaced from Lake Powell as the reservoir drops.

speculate decades down into the future."

Powell, and all the reservoirs in the Colorado River system, have been "a very important resource," she added. "Without them we would have had this crisis years ago."

Reclamation is studying how to operate the dam in a way that would minimize the risk of damage to infrastructure at low water levels, Grantz said in June. The agency is also conducting an initial appraisal study to assess costs of dam modifications. Whether those are pursued is ultimately up to Congress, though, she said.

Shawcroft said he's not ready to "throw in the towel" and say one reservoir will be enough. Modifying the dam also won't solve the "the math problem," he said, which is that water consumption is exceeding supply in the basin.

"It doesn't generate one drop of additional water, and I don't know what the cost will be, and I don't even want to guess," he added.

The bigger picture, Balken said, is that the basin needs to figure out how consume less water. "Every basin state should have a curtailment plan," he said. "It should be

mandated by the federal government."

The latest most-probable reservoir elevation forecast from Reclamation shows Powell dropping below 3,500 feet by the end of February 2027. The July study was more optimistic than forecasts in recent months, though, and doesn't show Powell dropping below minimum power pool, 3,490 feet, in the next year.

The July minimum probable study, which has been more accurate in recent years, shows Powell dropping below 3,490 by the end of February 2027.

Releases from Flaming Gorge gave Powell a boost in May. But it began dropping again after June 1, and Flaming Gorge releases now are only slowing Powell's recession, not increasing storage, Schmidt said in an email.

"We are in uncharted territory," Balken said.

WATER MANAGEMENT

A Colorado River deal is expected this week. How will it impact Utah?

The reported deal doesn't involve Utah, but here is what we know about how it would impact the state.

By **ADDY BAIRD** | *The Salt Lake Tribune*

Three of the seven states who rely on the Colorado River for water are expected to announce a key deal this week to reduce usage, according to a Los Angeles Times report.

For Utah, the reported deal could take negotiating pressure off the state and others in the upper Colorado River basin — Wyoming, New Mexico and Colorado — for now, some water experts here say.

The reported deal only involves lower basin states California, Nevada and Arizona. The major Colorado River-users, the Los Angeles Times reported, have come to an agreement with federal officials to cut the amount of water they collect from now through the end of 2028.

Just how much would be cut? California would slash 12% of what it uses now, followed by a 31% cut in Arizona and a 28% cut in Nevada, according to the Los Angeles Times report.

That all is supposed to save at least 3.2 million acre-feet through 2028. (An acre-foot equals the amount of water needed to cover an acre of land with a foot of water.)

It's an amount the three states initially proposed saving in a May 1 offer. The reported deal comes after significant back-and-forth between the federal government, Native American tribes in the area and the seven states that rely on the river.

The states have missed multiple deadlines to come to an agreement. In May, Utah and the upper basin's three other states called for "immediate mediation."

"[A] long term sticking point has been the Upper Basin's refusal to

Please see **DEAL, A5**

Deal

» Continued from A1

take any mandatory cuts," said Jack Schmidt, a Colorado River expert, in an email to The Salt Lake Tribune, "and I am skeptical if any sacrifice will be asked of the Upper Basin states."

Schmidt, who serves as the director of Utah State University's Center for Colorado River Studies, added that "[w]hat is expected of the Upper Basin is a commitment 'to try.'"

The expected deal comes as conditions in drought-riddled Utah worsen, and as the two reservoirs on the Colorado River combined — Lake Mead and Lake Powell — fell to their lowest levels on record last week.

Lake Mead is currently at 27% capacity, while Lake Powell sits at only 23% capacity. Schmidt noted that any dip in the amount of water released from Lake Powell means increased releases — and less water retained — at Lake Mead.

The only way to maintain Lake Mead's levels while also lowering the amount of water released from Powell, Schmidt said, is to supply less water to lower basin users — California, Nevada and Arizona.

The impact on Utah and other upper basin users remains somewhat unclear.

A spokesperson for Gov. Spencer Cox said his office was looking into the potential impact of the deal but did not immediately provide specific comment.

The Utah Department of Natural Resources directed inquiries about the reported deal to The Colorado River Authority of Utah, which did not immediately respond to a request for comment from The Tribune. Spokespeople for the U.S. Department of the Interior and the U.S. Bureau of Land Reclamation also did not respond.

Kyle Roerink, a senior adviser at the Great Basin Water Network, said the expected deal would come at a "prudent time" given the dire state of the river's reservoirs.

"We know that the system is trending in the wrong direction," Roerink told The Tribune on Tuesday, "and having no framework in place is not a way to instill confidence among the public at large in the desert Southwest."

Negotiations have so far been tense, with a split largely between the upper basin and lower basin states.

Twice, governors of all seven states have met together to discuss a deal to no avail, and the question of litigation over the issue has come to the fore. (During the most recent Utah legislative session, state lawmakers set aside \$1 million for a potential Colorado River legal fight.)

And while the potential deal is a positive step, Roerink said it "isn't the beginning of the end" of conversation — and debate — about the Colorado River.

"This is the end of the beginning," he said.

Another data center near Great Salt Lake? Utahns speak out.

The proposed Tooele Valley project is backed by the Utah Inland Port Authority, but residents worry about pollutants going into the lake.

By LEIA LARSEN | The Salt Lake Tribune

Note to readers » This story is made possible through a partnership between The Salt Lake Tribune and **Grist**, a non-profit environmental media organization.

Another data center planned near the shores of the Great Salt Lake faces mounting backlash.

Staffers with the Utah Division of Water Quality listened to two hours of frustrated comments Monday evening as they contemplate a permit that would allow discharge from an industrial development called the Tooele Valley Project Area. The wider project is supported by the Utah Inland Port Authority, and would include a 500-megawatt data center and a truck stop. Plans call for pipe up to 250,000 gallons of polluted water each day into Gilbert Bay on the Great Salt Lake's southern end.

"We all know the Great Salt Lake is the beating heart of our watershed," filmmaker Alyssa Swanzey said.

Courtesy of Utah Department of Environmental Quality

Dozens of Utahns attend a public hearing hosted by the Division of Water Quality to oppose a water discharge permit for the Tooele Valley inland port and data center project on Monday.

"Without a healthy lake, this valley won't survive."

The Tooele Valley project needs a water discharge permit because it would include a reverse osmosis treatment plant to provide water for the

development.

The division regulates industrial developments that flush pollutants into the environment via the "Utah pollutant discharge elimination system," or

UPDES. Once the state issues a UPDES permit, the facility operator must monitor its discharge, keep pollutants under specified concentrations and self-report each month. The facility could see fines up to \$10,000 a day for violating the permit.

Opponents of the Tooele Valley project called those penalties a slap on the wrist.

"The fines ... are pocket change," said Jean Tabin, a physician from Park City. "The company's not going to care."

The Division of Water Quality gathers public comment as part of the permitting process, which prompted Monday's meeting. Staffers warned meeting attendees that the division does not consider feedback outside the scope of the water quality permit. But commenters discussed topics like air pollution, dust, energy use, noise and nuisance anyway.

"As the Great Salt Lake continues to dry up, what ends up in our lakebed ends up in our air as dust, and it ends up in our mountains and in our lungs," said Alexis Rowley, a Brigham City resident. "It's very fragile ecosystem, and what we do here stays here."

'Forever chemicals'

While artificial intelligence data centers are increasingly turning to closed-loop cooling systems so they use less water, those systems occasionally need to be flushed, and the water can become polluted with PFAS (per- and polyfluoroalkyl substances) also known as forever chemicals. Commenters also worried about diesel and gas pollutants washing into the

RICK EGAN | The Salt Lake Tribune

Inland port site near Tooele.

lake from the truck stop.

The Utah Inland Port Authority collects property taxes to create incentives to build infrastructure and fuel industrial development. The agency issued a statement in late June noting that it prioritizes protection of the Great Salt Lake, is not actively recruiting data centers, and does not offer incentives for data centers.

But the Tooele Valley developer, Charles "Chuck" Akerlow, previously told The Salt Lake Tribune that his project would not be possible without the incentives and financing provided by the port authority. He said his data center would cover around 200 acres.

Another 20,000-acre data center planned near the north

shore of the Great Salt Lake, called the Stratos Project, also received backing from a quasi-government agency called the Military Industrial Development Authority, or MIDA, to the ire of many Utahns.

Like MIDA, the port authority's governing board includes legislators. Sen. Jerry Stevenson, R-Layton, and Rep. Paul Cutler, R-Centerville, currently hold seats. Stevenson also sits on the MIDA board, along with Senate President J. Stuart Adams, who lost his primary election in June amid the fallout from the Stratos Project.

The Stratos Project is backed by TV celebrity Kevin O'Leary. It spurred multiple protests and a deluge of bipartisan opposition from across the state. At full build, plans for the hyperscale data complex would gobble up to 9 gigawatts of energy, more than double the state's current consumption.

In an interview Tuesday, inland port Executive Director Ben Hart said his agency will prioritize the wishes of Tooele County over those of the developer. The port authority, he added, also has environmental stewardship in mind.

"So far," Hart said, "the port has not taken any action to support development of data centers in any project areas across the state."

Tooele County officials have not approved any plans for the Tooele Valley data center. In June, after the Stratos Project outcry, the County Council adopted an ordinance directing staffers to recommend rules and regulations for data center developments.

'Irreparable damage'

Tooele Valley's data center would be smaller than Stratos, but like many data centers popping up across the state, it would generate its own energy using natural gas generators. That would also require permits from the Utah Division of Air Quality.

Although Monday's water permit hearing did not devolve into shouting and outbursts like meetings this spring for the Stratos center, residents raised similar concerns.

"This proposal is not based in the hard facts of our present reality and will inflict irreparable damage on the environment," Utahn Clive Romney said to thunderous applause.

Commenters worried about paving over a fragile ecosystem that supports wildlife and millions of migrating birds. They questioned the data center's water demands, with the Great Salt Lake teetering on the brink of another record low. They noted Tooele County's water is overtapped and has been subject to a state-mandated groundwater management plan since the 1990s. They complained that politicians seemed more concerned about enriching developers than protecting Utahns and the environment.

"When the lake dries up, people younger than me are going to die of arsenic poisoning," said Michael Kalm, a past president of the Utah Psychiatric Association, "and my concern is that people who are in business and have a profit motive, they don't see that."

Courtesy of Utah Department of Environmental Quality
